QuickSet plus	**Article number: 9070532**

Description

- Infrared remote control for the convenient start-up of ThebenHTS presence detectors
- Suitable for all presence detectors except all PlanoCentro and PresenceLight KNX

- Rapid adjustment to changed operating conditions without uninstalling detectors
- Transmission of individual settings or complete value packages to the detector
- Call up of pre-defined value packets for typical rooms
- Storing and calling-up 8 user-defined value packets
- Onscreen text guidance
- The QuickSet plus service remote control for the electrician enables efficient start-up and flexible adaptation to new applications.
- Setting of all potentiometer values at the push of a button

- Functions such as test/reset can be called up
- Setting changes made with QuickSet plus are saved even in case of loss of power or resetting of detector.
- Frequently used settings can be saved, retrieved as required at any time, and transmitted to the sensor.
- Typical values for different rooms (office, corridor, WC, etc...) are pre-defined in QuickSet plus.
- User defined settings can be stored in QuickSet plus. 8 memory locations are available per sensor type.
