LUTEC
 CONNECTED BY LIGHTING

**SHOP
 in
 SHOP
 17/18**

Creating outdoor lighting fixtures in many different sectors of use, **LUTEC** is becoming a leader in the lighting field.

The **LUTEC** centre is located in China and combines all our design and engineering services as well as our main factories. An international network has been established in Europe, with the opening of our European Central Warehouse in Germany, in the USA and the Middle East...

From the architectural sector where we concentrate more on the light effect and the visual impact of the products, to camera security lamps using advanced technology and interfaces our experience is becoming transversal.

This enables ideas to be crossed so that all the products are permanently evolving in terms of conception and production.

Today, our **LUTEC** brand expresses innovation and design, and focuses on a correct positioning in terms of quality and cost: "making quality products accessible."

LUTEC introduces **SHOP in SHOP**

SHOP in SHOP shows the possibility, within our ranges, to build a complete and coherent offer for consumers in different outdoor lighting sectors.

SOLAR LIGHTING

LUTEC has a variety of different concepts covering the solar energy field.

The smaller products are portable illustrating light mobility, pleasant and ubiquitous to use.

The wall lights give a real efficient light and are built following two principles, using an integrated or independent solar panel, answering to different implantation needs which are easy and quick to install. The bollards complete the offer...

Shop in Shop is a means to select and organise a dynamic and coherent choice to users, with complementary products.

**SHOP

SHOP**

CAMERA LIGHT

New to the LUTEC offer, the lighting fixtures are equipped with a camera and sensors all controlled through the LUTEC app. Mainly for security but also to give real comfort in the way to manage the immediate environment of your home. Here too, the offer is diversified in terms of product's image and specifications.

Shop in Shop presents the whole SECURY'LIGHT program and shows in an inspirational and didactic way the possibilities of the concept.

**SHOP
in
SHOP**

ARCHITECTURAL

Leds have drastically changed and influence the creation of new lighting products.
The offer is larger responding to architectural variety, location and living context.
Need for efficiency but also for harmonious integration when using one or several products.
Wall, bollards or ceiling design are diversified but can work complementary.

Shop in Shop shows this diversified offer. In a way that every consumer can find back in a fast, simple and intuitive way the solution for his different outdoor lighting applications.

WORKLIGHT

DIY is a growing activity becoming more and more popular.
To meet demand, LUTEC has designed a complete range, from small autonomous portable lamps to different tripods equipped with multi light heads.
Bright and easy to use, to install and transport.
These products are used in all kinds of workshop, outside, gardens, terraces, BBQ parties, punctual needs... We have focused on the mobility but also, we have developed fixed fixtures specifically for the workshop, garage, terraces with wall or ceiling applications.
This series is really representative of a complete universe where people can find the right products.

Shop in Shop covers the different levels of use.
