What can we do for you?

Creating outdoor fixtures in many different sectors of use, LUTEC is becoming a leader in the outdoor lighting field.

The LUTEC centre is located in Yuyao (China) and combines all our design and engineering services as well as our main factories. An international sales & logistic network has been established in Europe, USA, Middle East & Australia.

In 2019, the refreshed LUTEC brand identity will be launched based on our three main drivers: Vitality, Curiosity & Status. A dedicated 360° brand support program has been developed for each of the 6 Activity Segments.

Solar? Yes, please!

LUTEC has a variety of different concepts covering the solar energy field. The smaller products are portable illustrating light mobility, pleasant and ubiquitous to use. New in the portable offer is the POPPY Solar floor stand, the all in one lighting solution to enjoy your summer nights. The wall lights and bollards are built following two principles, using an integrated or independent solar panel, answering to different implantation needs which are quick and easy to install.

Today, as a result of continuous research, the highly efficient solar panel in combination with powerful LED modules are giving a really satisfactory light level. Making the most out of the available solar energy is cleverly realised by intelligent user interfaces such as 3-step dimmers, timers and PIR-sensors, resulting in more autonomy and desired light levels.

It's all about the **sensor**

LUTEC launches the InMotion concept offering a complete range of Security Sensor Lights.

The integrated PIR sensor equipped with multiple parameter settings enables the installation of a perfect detection system.

The detection area varies from 12 metres up to 20 metres. The use of double sensors in the same luminaire assures a 100% full coverage. No one will pass unnoticed!

The range is featuring now, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house.

The 2 stand-alone PIR sensors with multiple controls make the range complete.

security

CAMERA LIGHT
connected security concept

Always **connected** with your home

As market initiator LUTEC is proud to present the 2nd generation of the connected camera range.

This brand new range has been developed based on learning and consumer insights over the last 3 years and by applying the gains and innovations of the fast evolving connected technology.

This has resulted in a limited range of compact and very convenient camera lighting fixtures, ready to install or to make a swift replacement of your actual outdoor luminaires.

Give it your own **twist**

LED's have drastically changed and influenced the creation of new lighting products. The offer is responding to architectural variety, location and living contexts.

Need for efficiency but also for harmonious integration when using one or several products: wall, bollards or ceiling designs are diversified but work and can be complementary.

New in the LUTEC offer: luminaires with rotating light heads for versatile applications resulting in a magical outdoor light effect.

make your outdoor life smarter

LUTEC introduces a range of Outdoor luminaires with the integrated WiZ connected light module. Combining high quality weatherproof aluminium fixtures with endless possibilities to control the powerful LED light. Get your outdoor lights to do everything you want and more. Triggered by your voice, remote or sensor, you'll always have the right light at the right time. Create the perfect outdoor atmosphere for each occasion just like a lighting designer.
