

WHY FLIR C3?

Building and electrical professionals who already use thermal imaging know what a useful tool it is for finding hidden heat issues that can turn costly if gone undetected. Home inspectors, plumbers, building renovators, residential electricians, HVAC technicians, and many more are lining up to own this powerful technology. They've been asking for a thermal camera that's compact enough to carry with them anywhere so they don't miss an opportunity. One that's affordable enough to fit practically any tool budget, yet still includes the must-have features that can help them get the job done right. FLIR C3 is the answer.

SEE THE HEAT:

Reveal heat patterns and temperature differences that can point to evidence of overloaded circuits, missing insulation, loose connections, moisture intrusion, and other invisible electrical or building problems.

SAVE TIME:

Thermal imaging provides a non-contact, non-destructive way to look for hidden problems quickly so you get more done in a day.

DOCUMENT YOUR WORK:

There's no disputing what the FLIR C3 sees. Using the included FLIR Tools reporting software, thermal images can help you verify needed repairs, and provide before/after proof that projects were completed right.

STAND OUT FROM THE COMPETITION:

The C3 is Wi-Fi enabled so you can instantly share compelling thermal images with customers. You'll add to your technical expertise and become their referral of choice.

POWERFUL THERMAL IMAGING RIGHT IN YOUR POCKET

The FLIR C3 is a full-featured, pocket-sized thermal camera designed to be your go-to tool, whether your work is building inspections, facilities maintenance, HVAC, or electrical repair. Keep it on you so you're ready anytime to find hot fuses, cold air leaks, plumbing issues, and more.

The C3's must-have features include MSX® real time image enhancement, area maximum or minimum temperature measurement, and Wi-Fi connectivity – so you can quickly get to the job of finding hidden problems, sharing images, and documenting repairs.

KEY BENEFITS:

- Sees heat issues that your eyes alone can't
- Wi-Fi enabled for instant peer-to-peer image sharing
- Area measurement box measures hottest or coldest spot (max./min.)
- Captures temperatures from -10°C to 150° C
- MSX® detail for seeing numbers, labels and more
- Saves radiometric JPEGs to help make your case
- Auto-orientation for easy viewing
- Carry it on you, ready to go
- Affordable MSRP to fit anyone's tool budget
- Free FLIR Tools analysis and reporting software
- C3 pouch included

KEY FEATURES

- 1 Light, slim profile
- 2 Bright 3" touchscreen
- 3 Built-in LED work light & flash
- 4 Big snapshot button stores thermal, visible, and MSX in each JPEG
- 5 Easy-access on-off button powers up fast
- 6 USB Micro-B File & Data Transfer
- 7 Visible Camera
- 8 Thermal Camera
- 9 Intuitive User Interface
- 10 Wi-Fi
