

GET THE RIGHT TOOLS FOR YOUR BAG!

BUY A FLIR C3, GET A FLIR VP52 AT A REDUCED PRICE!

Having the right tools at your fingertips will help you find hot spots, diagnose failed equipment, and make repairs quickly. And now, you can get the tools you need while saving money.

The rugged FLIR VP52 is a CAT IV-rated Non-Contact Voltage Detector, featuring a combination of voltage alerts, powerful LED flashlight, and versatile voltage sensitivities.

Key Features Include:

- Low-profile probe tip that gets the sensor closer to electrical sources
- Intense, 60-lumen light source
- High-sensitivity mode to help detect systems behind obstructions

High sensitivity mode is useful for working on low-voltage systems

Low-profile tip helps when working with safety outlets.

Valid from April 10th to September 30th 2018 via a selection of valid and authorized distributors in Europe, Turkey and Africa
