# Innovation catalogue **2020**

WE  
**power**  
YOUR LIFE.

In the field of electrical engineering, BACHMANN is well positioned for numerous areas of application, for which I am thankful. We are always delighted to make the shortlist whenever customers are looking for quality, attractive design and innovative solutions. For me, product attributes are just one part of what we offer – it is at least equally important to ensure that every product reflects our values. These are values that we put into practice every day.

**Future Viability** is a constant source of motivation for us. We aim to surpass your expectations and those of your customers by incorporating superior added value into our products – and increasingly into the systems and platforms of the future.

**Passion** is plain to see in our products. Each and every day, our highly motivated colleagues invest their inspiration and expertise in expanding and advancing the BACHMANN portfolio.

**Trust** is the foundation on which new and decades-long customer relationships are based – and also an important sign of quality in our collaborations.

**Authentic You** and **Respect** nicely summarise our overarching goal of giving you and your customers a feeling of true appreciation and a little more 'Life Quality' with each day that passes.

In this catalogue, we are delighted to present new takes on our classic products alongside innovations from BACHMANN. On that note, we wish you success with your business in every sense.

**Peter Bachmann | CEO**

## Research & development

- Company-owned sites in Germany and China
- Company-owned labs for conducting function and safety tests
- Certification in line with the strictest standards (e.g. DIN EN ISO 9001)
- Strong development network with external partners

## Sales channels

- Subsidiaries:
  - BACHMANN Romania S.R.L. (Medias, Romania)
  - BACHMANN Hong Kong Ltd. (Hong Kong, China)
  - BACHMANN S.A.R.L. (Tremblay, France)
  - BACHMANN Electrical Engineering Ltd. (Milton Keynes, UK)
  - BACHMANN S.A. (Barcelona, Spain)
- International agents:
  - Albania, Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Czechia, Denmark, Estonia, Finland, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Macedonia, Montenegro, Netherlands, Norway, Poland, Portugal, Russia, Serbia, Slovakia, Slovenia, Sweden, Switzerland, Ukraine, United Kingdom
- Close partnership with electrical wholesalers
- Key account managers
- Customised OEM solutions
- Individual project solutions

For details of all **contacts**, see page 46.

## Production

- Production sites in Germany, Romania and China
- 100% function testing in production

Our German production site in Gumpelstadt, Thuringia.

# Technologies and function modules

BACHMANN products are distinguished by their functionality and high technical standards. It is important to us that we tailor our products as specifically as possible to you. To this end, in addition to the standard functionalities, our products can also be configured with the technologies and function modules presented in this catalogue.

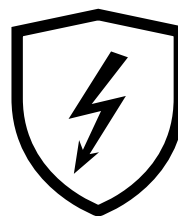

We aim to satisfy your individual requirements as best we can.

Are you unable to find a particular functionality, or you would like to ask something else? Please contact us for an individual quotation!

---

## Surge protection

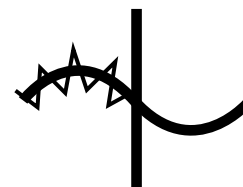

These days, the failure of electrical and electronic devices is a real nightmare scenario. Protecting such devices from excess electrical voltage is therefore a key task. Here, the BACHMANN strips with built-in surge protection are the ideal solution.

---

## Mains and frequency filters

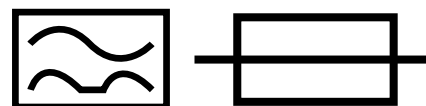

Mains and frequency filters ensure effective screening and smoothing of the input voltage. Only 'clean' voltage gets through our mains and frequency filters. Voltage stabilisation and the filtering-out of disturbance frequencies enables the connected device to run correctly and faultlessly.

---

## Residual current devices/miniature circuit breakers

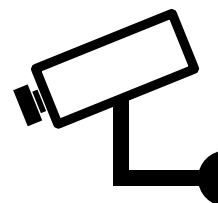

The residual current device/miniature circuit breaker integrated into a BACHMANN strip gives you peace of mind. You can choose between the two circuit breakers; a combination of the two is also possible, of course.

---

## Anti-theft bracket

The anti-theft bracket is fitted permanently in the product and enables a Kensington lock to be affixed: anti-theft protection for mobile hardware such as laptops, desktop PCs, projectors, LCD screens, tablets, etc.

### iotspot

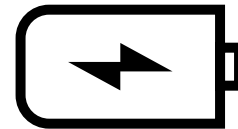

With iotspot integrated into a BACHMANN design connection panel, such as the DESK 2, it is quick and easy to search for, find and reserve workstations. Not only that: facility managers will receive detailed data and analyses on workplace utilisation and therefore also valuable knowledge with a view to cost optimisation.

---

### USB chargers (fixed installations and Custom Modules)

USB chargers from BACHMANN are able to supply all standardised voltage profiles to the load. Power Delivery and Qualcomm enable fast, intelligent charging. Furthermore, the chargers feature integrated current limitation and protection against excessive temperatures. Their compact design means that they can be integrated into all conventional BACHMANN products.

---

### USB 3.0 Hub

The USB 3.0 Hub is an active USB component. It has a plug mains adapter that supplies the connected USB devices with voltage.

---

### Data switch

Small, compact and easy to integrate into BACHMANN power strips: the high-speed network data switch provides PoE (Power over Ethernet) for selected devices.

# Information on the page structure

## FINDING YOUR WAY AROUND

The new catalogue structure features three levels: product family, product category and product variant.

## PRODUCT DETAILS

The body text contains all central information such as product name, special product features, areas of use, benefits and – if applicable – design awards.

## PRODUCT ATTRIBUTES

All the technical attributes of a product are shown together in the bottom left of the page and are marked using a gear symbol.

● Network and media technology | Custom Modules

## ● USB-A&C Custom Module

The new, space-saving 22 W Custom Module uniquely combines a USB-A and USB-C port. It is ideal for charging common smartphones and tablets as well as many other electrical devices with USB-A or the latest USB-C technology – without cumbersome external mains adapters. Thanks to the integrated USB Power Delivery (PD) and Qualcomm® Quick Charge™, fast charging is no longer a problem.

Quick and flexible in use: the new module is ideal for retrofitting and upgrading existing installations.

### BENEFITS

- **USB-A and USB-C in one**
- **Latest USB-C charging technology**
- **Ideal for retrofitting and upgrades**
- **Fast charging via PD and QC**
- **Integrated current limitation and overheating protection**

**PRODUCT TABLES**

Here, you will find product-specific information such as item number, version, colour, sockets, etc. for all product versions.

**Flexible in integration**  
Can be used easily and without difficulty in all BACHMANN desk connection panels with Custom Module mount.

**ADDITIONAL PRODUCT INFORMATION**

Below or above the product tables, you will find more information about the product and installation drawings.

You will find matching desk connection panels in the 2019 edition of the complete catalogue.

**COMPATIBLE ADDITIONAL PRODUCTS**

All information and page references to compatible additional products can be found in the bottom right of the page.

Pictograms and their meanings can be found on page 51.

# PRIMO 2

In addition to its high-quality materials and handy features, PRIMO 2 is distinguished by its contemporary design. Variable, screwless end caps lend an air of assured style. At the same time, the cable rewind helps with tidiness, while an optional design strap ensures maximum flexibility. Whether suspended horizontally, screwed on or hanging up – the PRIMO 2 is attractive and the perfect choice of power distribution for any contemporary office or home.

Function meets design: the PRIMO 2 impresses with its new technical, application-specific and user-oriented variants. For example, surge protection, a USB-A and C charger or a classic residual-current device can all be custom-integrated.

## BENEFITS

- **Screwless end caps**
- **Concealed mounting possible**
- **Tidier with cable rewind**
- **Optional suspension strap**
- **Sleek, appealing design**

# USB-A&C and USB-C

The new way to charge: the new USB-A&C and USB-C charging modules from BACHMANN provide the ideal solution for any application. With the innovative charging technology, any electronic device can be charged quickly and safely without an external mains adapter. Thanks to the integrated USB Power Delivery (PD) and Qualcomm® Quick Charge™ (QC), fast charging is just one of the many benefits.

The USB-A&C 22 W combi-module is the ideal solution for low- and medium-powered devices, such as common smartphones and tablets. The USB-C 30 W module can be used to charge medium-powered devices and small notebooks. With help from the USB-C 60 W module, a wide range of common electrical devices and powerful notebooks are also covered.

## BENEFITS

- **Latest USB-C charging technology**
- **Fast charging via PD and QC**
- **Integrated current limitation**
- **Overheating protection**
- **Available in a wide range of products**

**Material:** Aluminium | Plastic

**Socket colour:** Black

**Colour variants:**

### USB-C 60 W

For all common devices such as smartphones, tablets and laptops

### USB-C 30 W

For all common devices such as smartphones, tablets and smaller laptops

### USB-A&C 22 W

For all common devices such as smartphones and tablets

### For the perfect connection – USB 3.1 Gen2 Type C cable

# USB-A&C Custom Module

The new, space-saving 22 W Custom Module uniquely combines a USB-A and USB-C port. It is ideal for charging common smartphones and tablets as well as many other electrical devices with USB-A or the latest USB-C technology – without cumbersome external mains adapters. Thanks to the integrated USB Power Delivery (PD) and Qualcomm® Quick Charge™, fast charging is no longer a problem.

Quick and flexible in use: the new module is ideal for retrofitting and upgrading existing installations.

## BENEFITS

- **USB-A and USB-C in one**
- **Latest USB-C charging technology**
- **Ideal for retrofitting and upgrades**
- **Fast charging via PD and QC**
- **Integrated current limitation and overheating protection**

**Material:** Plastic

**Colour variants:**

### Flexible in integration

Can be used easily and without difficulty in all BACHMANN desk connection panels with Custom Module mount.

You will find matching **desk connection panels** in the 2019 edition of the complete catalogue.

# USB 3.1 Type C keystone

Switch to the new generation of USB connections today! USB 3.1 Type C is the latest standard in the world of devices. And with good reason: amongst other things, the new technology provides a simpler connection thanks to its smaller, anti-twist plug connector. It also supports the 'Power Delivery' functionality, which enables end devices such as tablets and smaller laptops to be charged.

BACHMANN's USB 3.1 Type C keystone module is the perfect interface for this. This flexible module can be quickly and easily inserted into all BACHMANN desk connection panels with modular keystone mounts and used straight away – subsequent changes are also possible. This also means that BACHMANN products already installed can be equipped for the future, too.

## BENEFITS

- **Anti-twist plug connector**
- **Fully assigned contacts enable data and power transfer**
- **Supports Power Delivery charging function up to 36 W**
- **Can be integrated at any time thanks to keystone module**

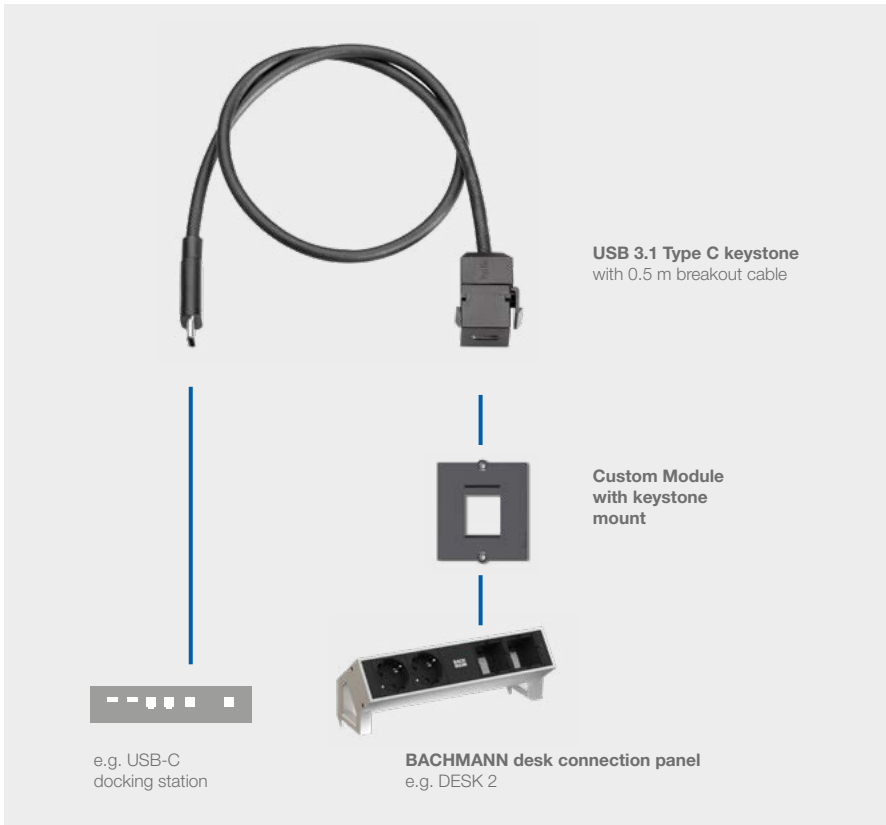

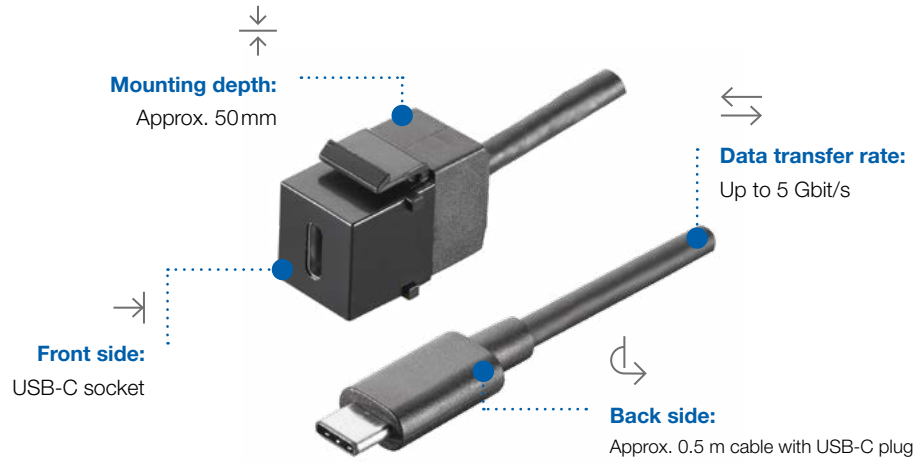

**Dimensions:** Cable approx. 0.5 m

**Material:** Plastic

**Colour variants:** 

### Simple connection

The keystone can be quickly and easily inserted into all BACHMANN desk connection panels with a modular keystone mount, then used straight away.

## USB 3.1 Type C keystone

· Black

#	
917.121	USB 3.1 Type C   Front side: USB-C socket   Back side: Approx. 0.5m cable with USB-C plug

**i** In order to safeguard the functionality, the maximum total length of the connection should not exceed one metre (keystone with 0.5 m breakout cable plus 0.5 m connection cable).

# INTUBLU

Do you love music and good design? Do you attach importance to a well-designed room concept and would prefer not to spoil the look with a loudspeaker that doesn't fit in? INTUBLU makes loudspeakers that spoil your room's look and get in the way a thing of the past – because from now on, furniture and surfaces will play back your hit list.

INTUBLU consists of two structure-borne sound converters and a Bluetooth mains adapter. Mount everything in the place of your choice – concealed inside cabinets, kitchen drawers or behind your bathroom mirror, pair with your mobile phone or other devices via Bluetooth to immediately enjoy your music in top sound quality. The surface vibration achieved by INTUBLU lets you make the most of existing furniture and forget about the design and loudspeaker cables getting in the way.

## BENEFITS

- **Technology and design united to the highest standard**
- **The best sound quality**
- **Space-saving design**
- **No cables or loudspeakers visible**
- **Easy mounting**

**Dimensions:** Diameter of structure-borne sound converter approx. 68 mm  
**Screw-on points:** Three screw-on points on the loudspeaker

**Material:** Aluminium

**Colour variants:**

Stream your music in the best sound quality  
**without loudspeakers or cables getting in the way.**

**INTUBLU**

· Can be mounted on wood, aluminium, glass, mirrors and plastic

Concealed inside cabinets, kitchen drawers or behind your bathroom mirror.

# iotspot

The office of tomorrow – available today for employees and facility managers. Do you know the actual extent of workplace utilisation in your building? Or perhaps you already have a desk-sharing model, but one where workplaces are difficult to find? – This is a real nightmare for employees. And for employers? That's quite simple: expensive office space standing empty.

With iotspot integrated into a BACHMANN design connection panel, such as the DESK 2, it is quick and easy to search for, find and reserve workstations. Not only that: facility managers will receive detailed data and analyses on workplace utilisation and therefore also valuable knowledge with a view to cost optimisation.

## BENEFITS

- **2 in 1 – combined connection panel and smart workplace management**
- **Informative facility dashboards**
- **No need for IT network integration**
- **Quick and easy set-up**
- **Intuitive app**

**Dimensions:** (W x H x D): See table x 85 x 100 mm  
**Tabletop thickness:** 10 – 40 mm

**Material:** Profile: Aluminium | Socket: Plastic

## Turn the office into your employees' favourite place.

Upon request, the iotspot module can also be incorporated into the DESK, DESK RAIL, CONFERENCE, TOP FRAME, CONI and POWER FRAME.

You will find more information in our **Next Generation Office** brochure or at [www.bachmann.com](http://www.bachmann.com).

# Independent Monitor

Whether in presentations, video conferences or on websites: the act of sharing visual content with colleagues, customers and partners is key to the world of work today.

The Independent Monitor from BACHMANN offers a new, flexible approach to teamwork: the battery pack means the monitor can be used wherever it is needed, irrespective of rigid infrastructure such as sockets, network connections or cabled devices. It is easy to operate and, thanks to a battery life of 6 to 8 hours, can be used to present information wirelessly for an entire working day.

The integrated status display on the battery pack provides a constant overview of the remaining operating time for the Independent Monitor. Batteries can be fully charged at night to enable reliable, efficient use during the day. A high-resolution display and integrated loudspeakers present audio and video content in high quality.

## BENEFITS

- **Plug & Play**
- **Position anywhere**
- **Long battery life**
- **Can be upgraded with various technical components**
- **Electric height adjustment**

**VESA hole distance:** max. 400 x 400mm  
**Display size:** 58"  
**Max. display weight:** 38kg

Colour variants:

You will find more information in our **Next Generation Office** brochure or at [www.bachmann.com](http://www.bachmann.com).

# Independent Workplace

Project-based, flexible working whether in a team or alone – with the Independent Workplace from BACHMANN, cutting-edge features are no longer just a vision of the future. Various scenarios can already be incorporated into the daily routine today. From mobile touchdown areas right through to fully fledged workplaces: the Independent Workplace's modular system enables maximum flexibility.

Autonomous of the power supply system and traditional building infrastructure, the wireless workplace can be flexibly and portably positioned wherever it is needed. The Independent Workplace is supplied as an expandable system kit. This consists of coordinated components that provide the desired mobility and spontaneity, while an innovative battery-pack system enables the workplace to run for an entire working day.

A power-distribution unit in the form of a multi-converter serves as the interface between various end devices and the power supply. Unregulated battery voltage is converted appropriately and supplies compatible hardware with the required operating voltage.

## BENEFITS

- **Mobile, thanks to wireless set-up**
- **Supports contemporary working philosophies**
- **Flexible in the event of workplace reorganisation**
- **Maximises flexibility and spontaneity**
- **Flexibility to respond to changing work situations**

### Desk connection panels:

# ZG1 MONITOR ARM

The ZG1 Monitor Arm not only features impressive ergonomics and convenient positioning. Its design is also a real highlight. In keeping with the Clean Desk principle, cables are simply hidden by cover plates that can be removed easily. Magnetic covers complete the appealing, contemporary design.

Functionally, its stability is impressive: based on spring-force technology, the arm can even support large monitors (3–11 kg, <34") with ease. The 360° rotation with the smart 180° lock feature ensures individual and secure positioning. The ZG1 Monitor Arm is easy to mount using the handy mounting-tool set behind the removable covers.

To avoid collisions under the desk, the mounting brackets are affixed to the tabletop edge from above.

## BENEFITS

- **Can be mounted from above**
- **High load capacity of up to 11 kg**
- **Clean Desk thanks to concealed cables**
- **Flexible positioning**

## AWARDS

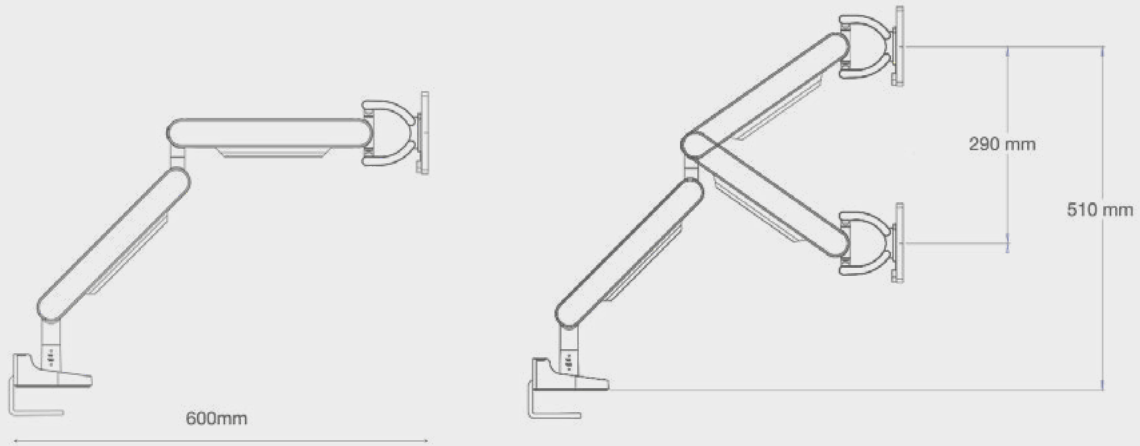

**Dimensions:** 600 x 510 mm  
**Mounting:** Easy mounting from above with mounting bracket.

**Material:** Aluminium

**Colour variants:**

Complete flexibility in **mobility**

Glossy chrome

Black

White

## ZG1 Monitor Arm

#	
<b>ZG1 Monitor Arm</b>   Dimensions (W x H): 600 x 510 mm   Monitor size 17–34"   Load capacity up to 11 kg   Monitor not included in scope of delivery	
945.001	Monitor Arm; black, similar to RAL9004
945.002	Monitor Arm; white, similar to RAL9003
945.003	Monitor Arm, glossy chrome

945.003

**Smart in approach:**

Concealed under the magnetic covers, the right mounting tool is always to hand.

**Easy mounting:**

No need to crawl under the desk – with mounting brackets, the base can be affixed effortlessly from above.

**Surprisingly strong:**

The strength of the ZG1 Monitor Arm enables it to carry monitors with a weight of up to 11 kg and a size of up to 34".

180° Lock

**Overshoot protection:**

The 180° lock function protects monitors against collisions with the wall behind.

# PEGGY

The neat PEGGY socket strip from BACHMANN promises a new dimension in flexibility and freedom for workbenches, garages and hobby rooms. You can rely on PEGGY wherever you need electricity without having to depend on the availability of sockets.

Thanks to its clamping fixture, the reliable multiple socket can be mounted without any tools on a tabletop edge, worktop, mounting aid, workbench, ladder or door leaf – just where you need it. Do you swap workbenches? Simply take PEGGY with you and clamp it in place in your new working environment.

The cable length of 3 metres guarantees you freedom of movement to do the job in hand. Its shutter, heavy-duty design and stable clamping-fixture grip make PEGGY a true all-rounder and a handy DIY helper.

## BENEFITS

- **Suitable for the home, hobby rooms and garages**
- **Countless custom applications possible**
- **Increased safety thanks to the shutter**
- **Heavy-duty housing and stable grip**
- **3-metre cable**

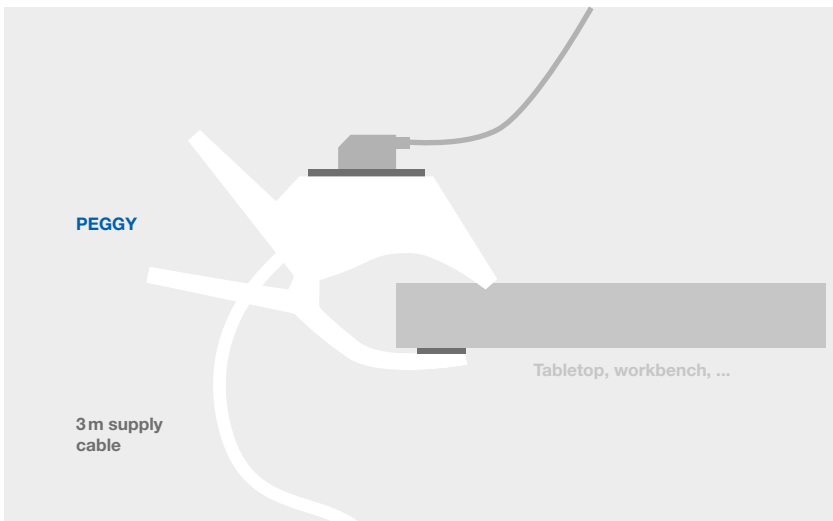

**Dimensions (W x H x D):** 165 x 133 x 80 mm

**Material:** Plastic

**Clamping range:** Up to 55 mm

**Colour variants:**

**Tabletop thickness:** 14–25 mm

**Flexible power source whenever and wherever you want**

Easy to attach anywhere without tools thanks to the stable clamping fixture.

**PEGGY**

- 3.0 m H05VV-F 3G 1.5 mm<sup>2</sup> supply cable with right-angled plug with earthing contact
- 16A/250V~ | IP20
- With enhanced touch protection
- Colour of the sockets: Dark grey, similar to RAL7010

## Pictograms and their meanings

#	Item number		Surge protection
	Version		Mains and frequency filter
€	Price in EUR		Colour
	Socket outlet with earthing contact		Residual-current device
	UK socket (3.15 A)		Automatic switch-off
	UTE socket		Rewirable
	Swiss socket (10A)	19"	Compatible with 19" racks
	European socket		Custom Module
	Italian/Socket outlet with earthing contact, P40		Keystone
	Italian socket (10A)		USB charger
	Socket orientation		Width
	Switch		Dimensions

## Further information

### Custom Module

Module that is screwed into an empty slot on a power strip.

### Keystone

Module that is inserted into a Custom Module using a keystone mount.

In principle, all of our power strips **have enhanced touch protection (a shutter)**.

For reasons related to the production process, there may be deviations from the specified dimensions and illustrations. We thank you for your understanding in this matter.
