INDU 3	Charging station with two 10 W chargers, LED battery-operated floodlight and LED battery-operated handlamp	4011160428326	42832

Technical details of the individual components of the sets can be found below.

INDU 3 **LED** **INDU 1**

Induction charging stations

Both charger with additional fold-out loading area for inductive charging of your mobile phone.

- Charger with 1x 10 W charging unit (set INDU 1 and INDU 2) or with 2x 10 W charging units (set INDU 3)
- Suitable for wall mounting with screws or installation on metallic surfaces with intergrated magnet, IP20
- Magnetic charging pad holds the floodlight during charging time
- Additional fold-out loading area for inductive charging of your mobile phone
- Includes power adapter and USB type C cable
- IP20: for indoor use

New classification of energy labels for light sources

On 1 September 2021, the obligation to label light sources with new energy efficiency classes came into force. Since then, all our
lighting products with mains connection are classified in classes A to G according to their technical data.
Important: Products powered by rechargeable batteries, products without illuminants, products with halogen illuminants and products with 82,000 lumens or more are excluded from the new regulation and are not included in the new classification. Therefore, there are no energy labels for these products.

On our website, you will find the new energy efficiency classes and labels on the respective product pages of the lighting articles next to the article number. Click on the symbol, to download the energy label and the corresponding product data sheet.
