KNX® secondary clocks

The clocks are ticking: synchronised and everywhere.

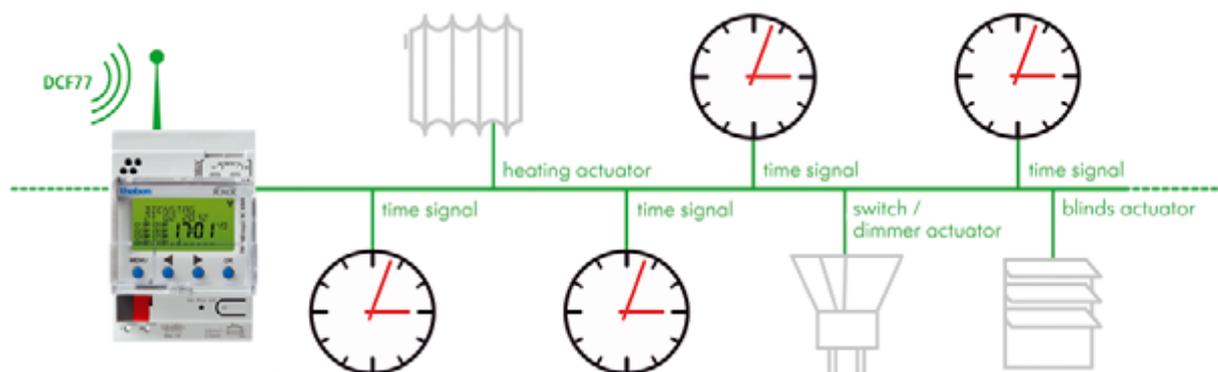

KNX secondary clocks

KNX secondary clock systems and their benefits

At railway stations and airports, in schools and administrative buildings, as well as in the industrial sector, the display play of the precise time plays an ever more important role. Clocks set the pace! Synchronising all the clocks in these spacious buildings is a great effort. Here, KNX secondary clock systems have a clear advantage. They control all connected clocks with only one time transmitter.

A KNX secondary clock system consists of a time transmitter and one or several KNX compatible secondary clocks, receiving the time signal. As a time transmitter, the TR 648 top2 RC KNX time switch or Meteodata 140 GPS weather station from Theben can be used. It sends the time and date signal to all connected clocks via the KNX bus. Especially with large and spacious arrangements, the advantage is obvious: All clocks are centrally synchronised.

Apart from the time signal, switch commands for lighting and climate control can also be sent via the KNX bus.

Economic benefits

The economic benefits become evident during installation and start-up: KNX secondary clocks are supplied with operating voltage and time information via the KNX bus. In comparison to a conventional clock system, where a separate supply network has to be installed, installation and start-up costs are significantly reduced.

Theben – Competence in time and KNX

Since its foundation in 1921, the roots of the company have been in time switch technology: Tariff time switches and staircase light timer switches were the products of the early days. Today, more than 90 years later, Theben is one of the worldwide leading manufacturers of intelligent solutions for time and lighting control, climate control and KNX building system technology. Since 1995, Theben has been a member of the "KNX Association" and has significantly contributed to the development of KNX becoming a worldwide standard.

Operating Modes

technologies appropriate for any task

	Function	Advantages
Synchronous clocks, mains operation 230 VAC/50 Hz Item No. starts with 21. ...	Accuracy is dependent on the frequency of the mains power grid, synchronous clocks are accurate at exactly 50 Hz. When mains power is lost, clocks will stop. Setting and changing the time indication are manual. Operating voltage: 230 VAC/50 Hz.	<ul style="list-style-type: none"> sturdy, long-life movement easy to install no battery to change second hand included
Quartz clocks, battery operation 1.5 V Item No. starts with 41. ... or with 44. ... (soundless type)	Accuracy is determined by an oscillating crystal. Average deviation is less than +/- 1 second/day. Setting and changing the time indication are manual. Operating voltage: 1.5 V.	<ul style="list-style-type: none"> independent of mains power next to no malfunctions most cost-effective type second hand included
Quartz clocks, mains operation 230 VAC/50 Hz Item No. starts with 42. ...	Accuracy is determined by an oscillating crystal. Average deviation is less than +/- 1 second/day. Setting and changing the time indication are manual. Operating voltage: 230 VAC/50 Hz.	<ul style="list-style-type: none"> easy to install no battery to change
DCF77 radio controlled clocks, battery operation 1.5 V Item No. starts with 51. ...	Synchronised by the DCF77 time signal radio transmitter in Mainflingen near Frankfurt/Main, time is always accurate to the split second. Time adjustment and changeover to summer/winter time are fully automatic. Operating voltage: 1.5 V.	<ul style="list-style-type: none"> uniform time indication adjustment and changeover to summer/winter time fully automatic mains-independent operation second hand up to 400 mm diam. included
DCF77 radio controlled clocks, mains operation 230 VAC/50 Hz (partly with power outage reserve) Item No. starts with 52. ...	Same mode of operation as battery operated DCF77 radio controlled clocks. When mains power is lost, clocks will stand still (clocks with power outage reserve will continue to operate). After return of power, the clocks will automatically return to accurate time. Operating voltage: 230 VAC/50 Hz.	<ul style="list-style-type: none"> uniform time indication adjustment and changeover to summer/winter time fully automatic maintenance-free (no battery to change) second hand up to 400 mm diam. included
Slave clocks, 12-60 V minute pulse Item No. starts with 71. ...	Slave clocks to be connected to a master clock. Control is by polarity alternating minute pulse. Presetting and changing of time indication are manual. Operating voltage: 12/24/48/60 V minute pulse.	<ul style="list-style-type: none"> uniform time indication solid, dependable, tried-and-true movement technology most cost-effective slave clock system
Slave clocks, 12/24 V minute/second pulse Item No. starts with 72. ... or with 73. ... (soundless type)	Slave clocks to be connected to a master clock with at least 2 slave clock lines. Control is by polarity alternating minute and second pulses. Presetting and changing of time indication are manual. Operating voltage: 12/24 V minute and second pulse.	<ul style="list-style-type: none"> uniform time indication solid, dependable, tried-and-true movement technology second hand included
Slave clocks, 12/24 V minute pulse with synchronous second hand 230 VAC/50 Hz Item No. starts with 74. ...	Slave clocks to be connected to a master clock. Control is by polarity alternating minute pulse. Second hand separately operated by 230 VAC mains power. Presetting and changing of time indication are manual. Operating voltage: 12/24 V min. pulse and 230 VAC.	<ul style="list-style-type: none"> uniform time indication Large, highly visible second hands feasible for clock faces up to 800 mm diameter (as known from railway station clocks)
Slave clocks, 12/24 V second pulse Item No. starts with 75. ...	Slave clocks to be connected to a master clock. Control is by polarity alternating second pulse. Presetting and changing of time indication are manual. Operating voltage: 12/24 V second pulse.	<ul style="list-style-type: none"> uniform time indication solid, dependable, tried-and-true movement technology second hand included
Slave clocks DCFport24 12/24 V pulse telegram Item No. starts with 81. ...	Slave clocks to be connected to a PEWETA type series 920 master clock. Control is by DCFport24 time telegrams. Presetting and changing of time indication are always automatic. Operating voltage: 12/24 V DCFport24 telegram.	<ul style="list-style-type: none"> uniform time indication time adjustment fully automatic simple setup for initial operation ("plug-and-play") second hand up to 400 mm diam. included
Slave clocks DCFport24 pulse telegram, 230 VAC/50 Hz mains operation Item No. starts with 83. ...	Same mode of operation as 12/24 V DCFport24 slave clocks. When mains power is lost, clocks will stand still. After return of power, the clocks will automatically return to accurate time. Operating voltage: DCFport24 (24 V) and 230 VAC.	<ul style="list-style-type: none"> uniform time indication time adjustment fully automatic simple setup for initial operation ("plug-and-play") second hand up to 400 mm diam. included
Slave clocks AirPort24 radio telegram, 1.5 V battery operation Item No. starts with 84. ...	Control is carried out by AirPort24 radio telegram emitted by a PEWETA AirPort24 radio transmitter. Presetting and changing of time indication are always automatic. Operating voltage: 1.5 V.	<ul style="list-style-type: none"> uniform time indication time adjustment fully automatic simple, cost-effective setup independent of mains power second hand up to 400 mm diam. included
Slave clocks, AirPort24 radio telegram, 230 VAC/50 Hz mains operation (partly with power outage reserve) Item No. starts with 85. ...	Same mode of operation as battery controlled AirPort24 clocks. When mains power is lost, clocks will stand still (clocks with power outage reserve will continue to operate). After return of power, the clocks will automatically return to accurate time. Operating voltage: 230 VAC/50 Hz.	<ul style="list-style-type: none"> uniform time indication time adjustment fully automatic simple, cost-effective setup maintenance-free (no battery to change) second hand up to 400 mm diam. included
Slave clocks, NTP synchronisation via LAN power supply by PoE Item No. starts with 91. ...	Slave clocks with RJ45 connection. Automatic time takeover from LAN. An NTP time server is required as a time emitter. Operating voltage: PoE (Power over Ethernet).	<ul style="list-style-type: none"> uniform time indication time adjustment fully automatic time zone adjustable per clock at any time second hand up to 400 mm diam. included
Slave clocks, NTP synchronisation via LAN 230 VAC/50 Hz mains operation Item No. starts with 93. ...	Slave clocks with RJ45 connection and separate power supply. Automatic time takeover from LAN. An NTP time server is required as a time emitter. Operating voltage: 230 VAC/50 Hz.	<ul style="list-style-type: none"> uniform time indication time adjustment fully automatic time zone adjustable per clock at any time second hand up to 400 mm diam. included

Operating modes functions and advantages

PEWETA DCFport24 Pulse Telegram

- self-adjusting slave clocks
- wire-based transmission of time data

DCFport24 pulse telegram function and advantages

Compared with conventional, "classic" slave clocks, PEWETA telegram-receiving slave clocks offer an advantage by not just being *advanced* by pulses but being *controlled* by time and date telegrams.

Time adjustment is fully automatic and independent of the current position of the hands. The time telegram (hour, minute, second, day, month, year) is transmitted by wire from a PEWETA Master Clock to the slave clocks.

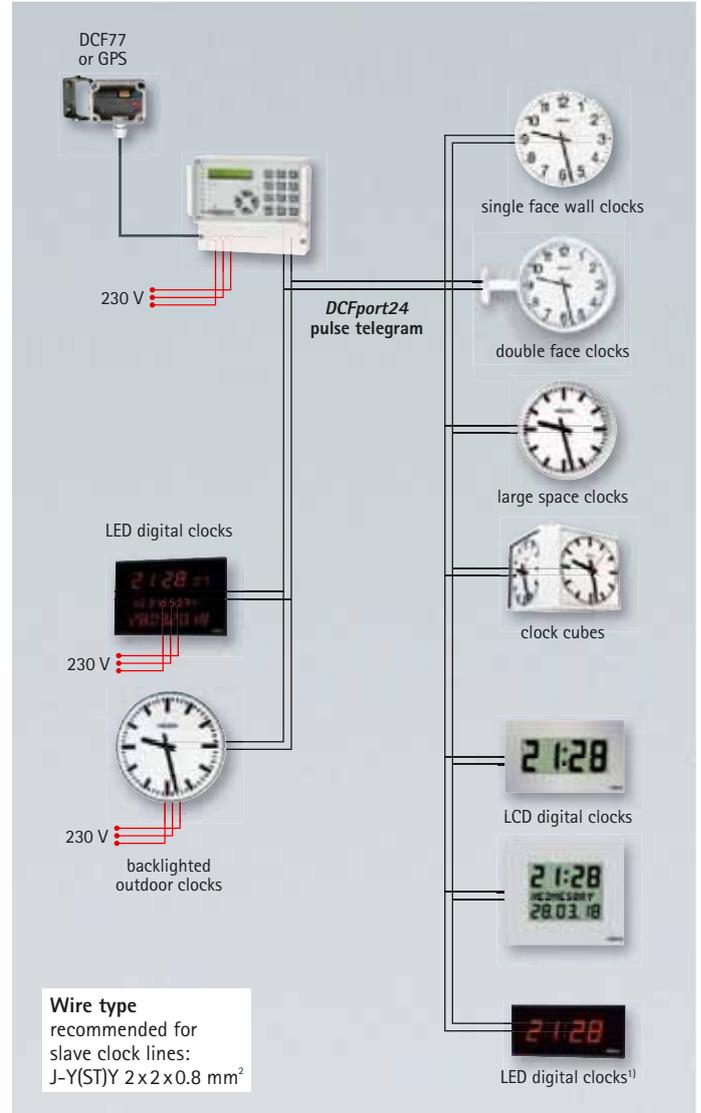

As standard, all analog DCFport24 pulse telegram slave clocks up to 400 mm diameter are already provided with a second hand, so the accurate time will be displayed accurately to the second.

Immediately after receiving the time telegram, digital clocks with a DCFport24 pulse telegram input will display the current time and, according to the model, the current date.

DCFport24 pulse telegram slave clocks will fully automatically reset themselves to the accurate time after accidental disruptions, e.g. wire break, loss of mains power. This is of special benefit when installing and maintaining clock systems with large numbers of slave clocks, clocks with two or four faces, or clocks mounted in areas with difficult access, like in high halls or outdoors. Wire-based PEWETA DCFport24 telegram slave clocks are also powered over the telegram transmitting line¹⁾.

Advantages

- simple, cost-effective "plug-and-play" installation
- rapid self-adjustment, no previous manual set-up necessary
- no need to pay attention to polarity
- existing slave clock wire networks may be re-used
- trouble-free expansion during operation without stopping the slave clock line(s).

Comparison	DCFport24 pulse telegram slave clocks	Conventional minute pulse slave clocks
operating mode	24 V pulse telegram	12/24/48/60 V minute pulse
transmitting wire	2-core wire, shielded	2-core wire, shielded
transmitted signal	complete date and time information	polarity alternating minute pulse
time display on analog clocks	up to 400 mm diameter: hour, minute and second hands over 400 mm diameter: hour and minute hands	hour and minute hands
date display on digital clocks	date and time will be set automatically	must be manually pre-set before initiation
initiation procedure	Slave clocks may be installed with random polarity, random position of hands and in any convenient sequence. Time display adjustment will be fully automatic.	All slave clocks must be connected with uniform polarity and manually pre-set to the planned initiation time. All clocks must be initiated simultaneously.
after initiation	No after-initiation check is required. All clocks have automatically "slaved" to the master clock time display.	Each slave clock must be individually checked for correct polarity of connection. Any discrepancies of hand position must be manually corrected.
additional clocks/lines	Additional clocks may be installed and connected in "plug-and-play" fashion at any time and will automatically adopt the master clock time display.	The line involved must be stopped. All newly installed clocks must be manually set to match existing clocks.
after line disruptions	Each and every slave clock will automatically reset itself when the telegram circuit is restored.	The line involved must be stopped. Clocks lagging behind because of missed pulses must be manually reset.

¹⁾ If the clock system includes LED digital clocks, additional booster amplifiers may be required for power supply, dependent upon the number and the types of these clocks. As an alternative, a 230 V power supply is possible.

PEWETA AirPort24 Radio Telegram

- self-adjusting slave clocks
- wireless transmission of time data

Wherever a **wire-based** time system cannot be implemented and/or expanded and the use of standalone DCF77 radio controlled clocks is inappropriate due to poor reception conditions, **wireless** PEWETA AirPort24 technology offers a professional solution.

Function

An AirPort24 radio telegram transmitter broadcasts complete time information (hours, minutes, seconds, date, and year) by radio (868..869 MHz) within a radius of cir. 250 m (indoors) and cir. 1,000 m (outdoors), respectively.

All AirPort24 radio telegram slave clocks within this radius will be automatically adjusted to current time and date.

Operating power for AirPort24 radio telegram slave clocks is supplied either by battery or by 230 VAC mains power.

Synchronisation

AirPort24 radio telegram transmitters are synchronised by one of these options

- 1 the DCFport24 pulse telegram supplied by a PEWETA Master Clock
- 2 a PEWETA DCF77 receiving aerial
- 3 LAN (RJ45 NTP input).

Expansion

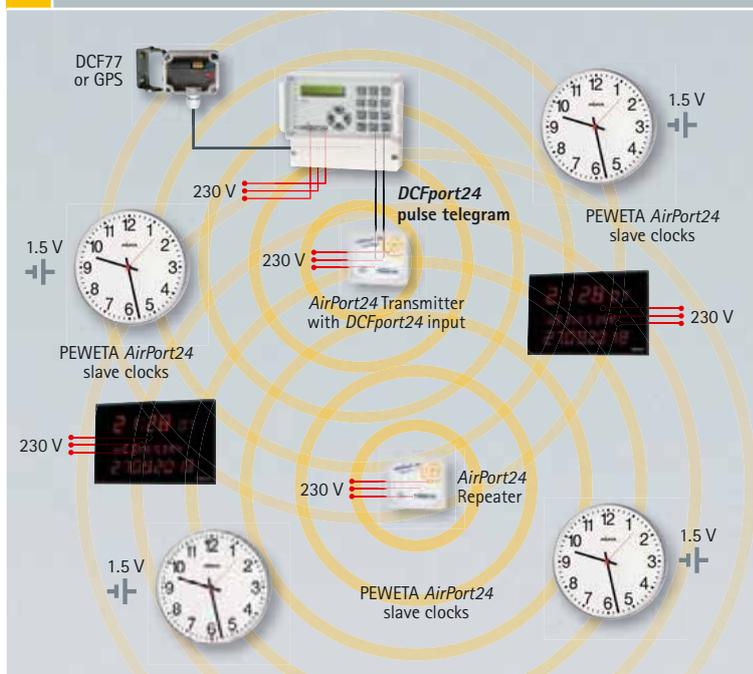

The range of the system may be expanded by the use of AirPort24 radio telegram repeaters. These receive the PEWETA AirPort24 time telegram from an AirPort24 transmitter at the periphery of the propagation area and relay the time telegram within a further radius of cir. 250 m (indoors) or 1,000 m (outdoors) towards the radio telegram slave clocks.

PEWETA AirPort24 radio technology is suited for a standalone, wireless time system as well as for the expansion of an existing conventional time system, whose wire network, for whatever reason, is not suited for subsequent expansion.

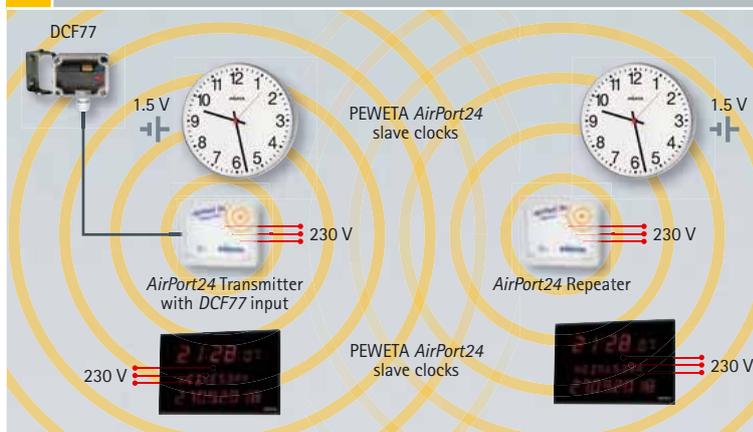

Advantages

- transfer of the **complete time and date protocol**
- **safe transmission** within a radius of up to cir. 250 m (indoors) and up to cir. 1,000 m outdoors, respectively
- **unlimited number** of AirPort24 radio telegram slave clocks within this range
- **expandable without limits** by repeaters (signal boosters)
- **simple, cost-effective and flexible installation**, no wiring necessary.

function and
advantages

NTP – Time and Date in an IT Network

NTP function and advantages

■ Synchronising time in a network by NTP

Network Time Protocol (NTP) is a server/client protocol used to provide time and date synchronisation in IT networks. Local networks (LAN) in industry or public administration may use it as well as wide-ranging networks, e.g. the Internet. NTP is universally compatible. Originally developed for the UNIX Operating System, today it is synchronising all relevant Operating Systems, like Windows, Mac OS, Linux ...

Only in a time-synchronised network it is possible to correctly document data files at different states of processing and derive useful information from protocol entries. Nowadays, a precise time-base is absolutely essential in almost all applications and services.

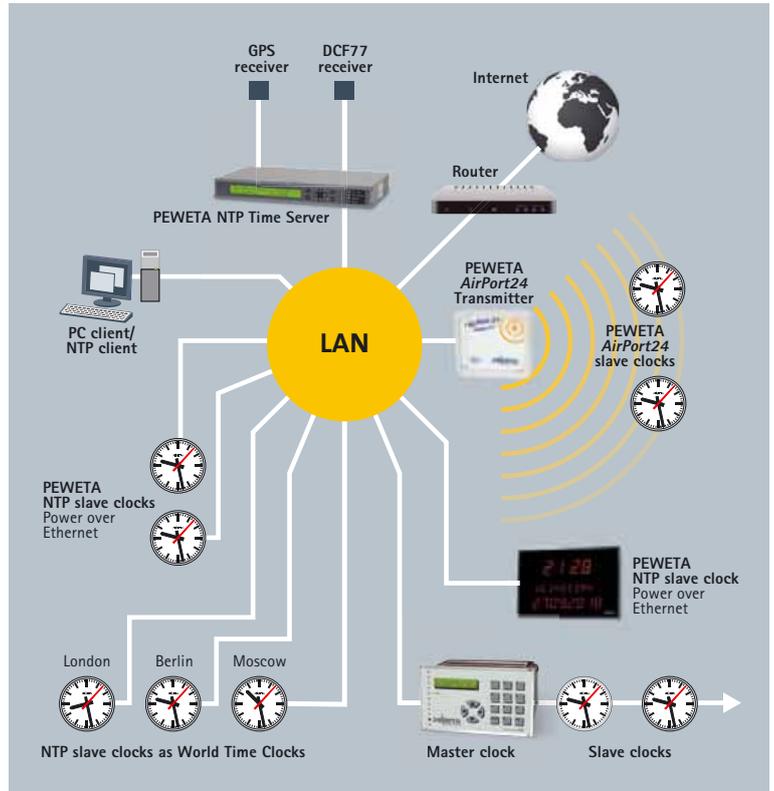

■ NTP Time Server

The PEWETA NTP Time Server (see page 191) offers this precise time-base, which provides time derived from a high level time standard (DCF77 or GPS receiver) to the IT infrastructure. This enables all so-called »clients« installed in the network, e.g. PCs, telephone systems, printers or clocks to be synchronised with this time-base.

PEWETA NTP Time Servers offer pinpoint accuracy even if DCF77 or GPS reception is down. Several NTP Time Servers can be clustered for redundancy to ensure accessibility within the network. Status messages or network and safety settings can easily be configured within a web based user interface.

■ NTP slave clocks

PEWETA NTP slave clocks (SNTP clients) may receive the NTP protocol from a variety of NTP servers (provided by PEWETA or already installed) and adjust themselves, accurate to the second. Every NTP slave clock can be adjusted to access any other freely accessible NTP server on the internet instead of its home network's NTP server. If the network includes a DHCP server (protocol for automatic client configuration by a server) configured accordingly, setup will be carried out in a "plug-and-play" fashion. A web-based user interface makes changes in the setup a comfortable task to be carried out in an internet browser. PEWETA NTP slave clocks receive their power supply by PoE (Power over Ethernet), thus a single cable is sufficient for connection. If PoE is not available, an external source of power can be utilised. NTP provides UTC time (Universal Time Co-ordinated). Since every PEWETA NTP slave clock may be adjusted to the local time zone or any other time zone desired by the user, these clocks may be used world-wide or may be assembled into a World Time Display. PEWETA NTP slave clocks are easy to install and operate, and generally maintenance-free as well as energy efficient.

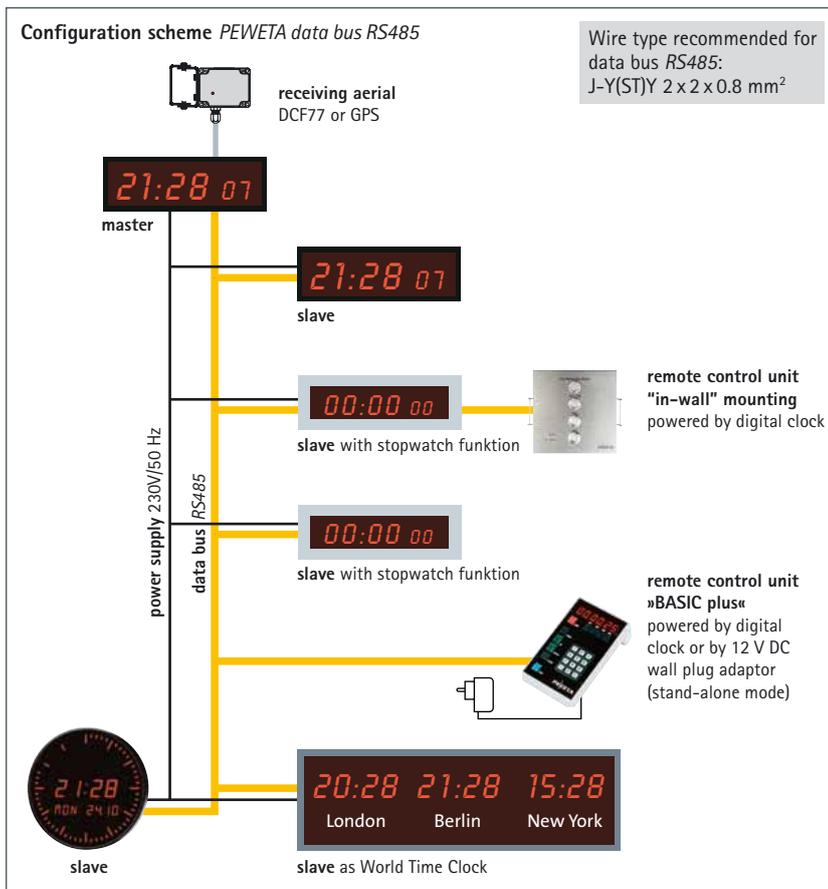

PEWETA Data Bus RS485 integrates LED digital clocks into a professional, flexible clock system. Down to the very second!

In addition to conventional synchronisation of digital clocks by a pulse or a telegram received from a master clock, PEWETA offers a specific time telegram for digital clocks: **PEWETA data bus RS485**.

PEWETA LED digital clocks, type *data bus RS485 master* are capable of synchronising and controlling up to 32 other LED digital clocks/stopwatches, type *data bus RS485 slave*, through an interface.

Besides transmission of time and date, LED digital clocks with stopwatch mode can be specifically addressed and operated by one or multiple remote control units via *PEWETA data bus RS485*.

Typical areas for the use of this networking technology are **hospital operating theatres**, the "media environment" of **radio and television studios** as well as **situation centres and map rooms, World Time Clock Systems** or any other environment, where precise time and date information, transmitted professionally, must be accessed reliably.

Data bus RS485
function and advantages

PEWETA data bus RS485

PEWETA data bus RS485 can be used to combine LED digital clocks into a network and thus build a sophisticated time system. Data are symmetrically transmitted via an *RS485* interface.

By means of *PEWETA data bus RS485*, up to 32 LED digital clocks can be combined into a high-performance network.

One of the LED digital clock will be fitted with a master clock function to serve as a *master*, while the other LED digital clocks will be configured as *slaves*.

Digital distribution of the entire time and date information is a safeguard for fast and continuous synchronisation.

Even in case of a disruption (line fault, etc.) of the *RS485* data bus, all LED digital clocks of the slave type continue to serve as fully adequate clocks with quartz-based operation.

After clearance of a line fault all *slaves* will automatically, within a few seconds, return to displaying current time and date.

Stopwatch function

By means of wire-based remote control units every LED digital clock connected to the *PEWETA data bus RS485* can be turned into a stopwatch (option). *PEWETA data bus RS485* will safeguard count-up and count-down functions of all stopwatches integrated, synchronous down to the second. Since each LED digital clock integrated into the system can be addressed individually, the remote control unit can on one hand trigger several stopwatch displays simultaneously. These can also be located separately. On the other hand, several remote control units, e.g. located at different desks, can trigger the functions of a single stopwatch.

The respective settings favoured must be configured upon installation.

Additionally, the active »BASIC plus« remote control unit (see page 145) can address one or more selected slaves directly. The 6-digit LED display on the remote control unit can be used as an additional desk display and or to show start values entered.

Advantages

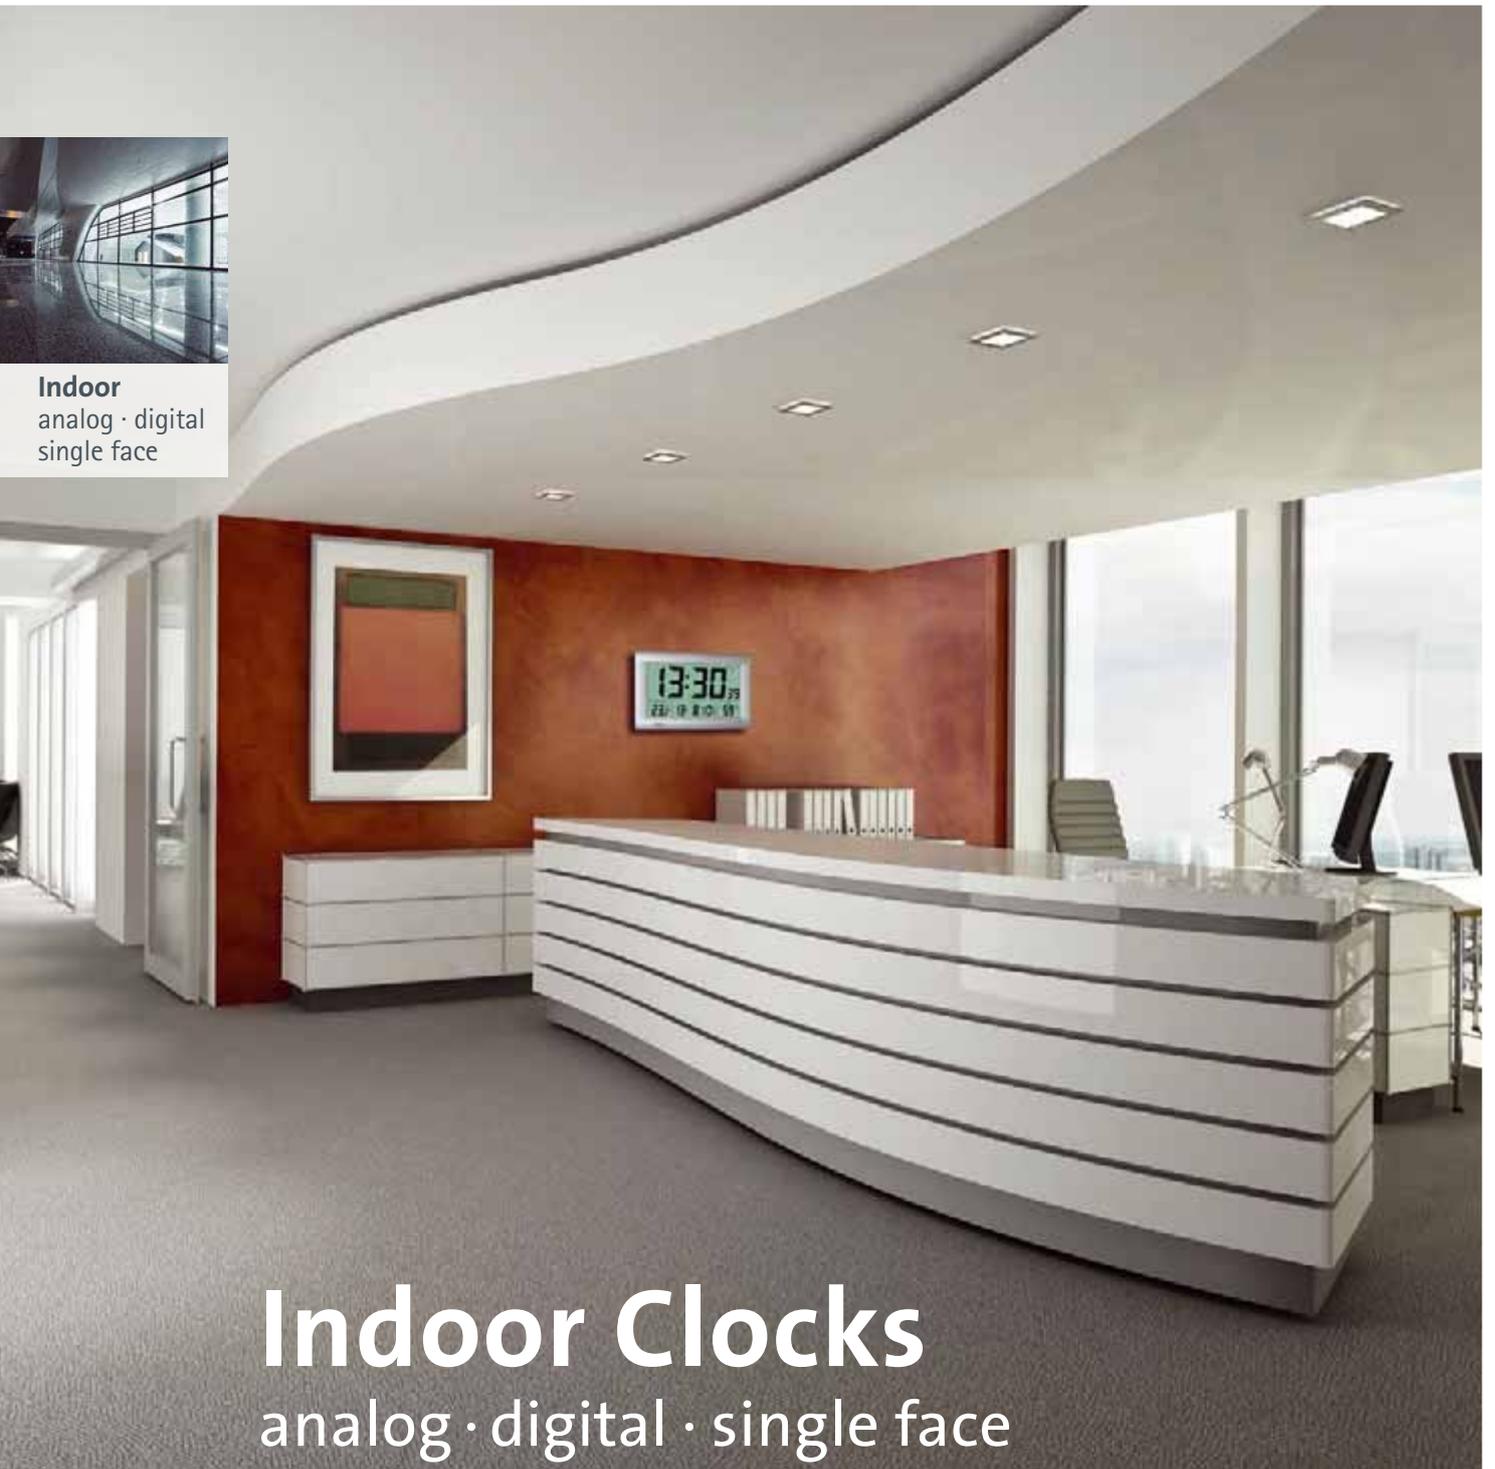

- PEWETA LED digital clocks of *master* type serve as the master clock controlling the *slaves* connected but additionally display the usual time (and date). Thus, a standard master clock is not required for this clock system but can, however, be employed to synchronise the *master*.
- All PEWETA LED digital *slave* clocks will be set to current time and current date within seconds.
- Each PEWETA LED digital clock is available in a *PEWETA data bus RS485* version.

The LED digital *master* clock can be synchronised by one of these options:

- a DCF77 or GPS receiving aerial
- 24 V minute pulses from a PEWETA Master Clock
- DCFport24 pulse telegram from a PEWETA Master Clock
- AirPort24 radio telegram from a PEWETA AirPort24 Transmitter
- LAN as an NTP client.

Indoor Clocks

analog · digital · single face

Sensible, matter-of-fact clocks in an attractive, up-to-date design. In the office or the shop, the surgery or the lab, the reception area or the cafeteria, the conference room or the lounge – in all those places these clocks earn the term »outstandingly suitable«.

DCF77 Radio Controlled Wall Clock

Time, date, temperature – everything at a single glance. And the price is right, too.

Case

■ Attractive, metallic silver coloured plastic case.
Protection grade IP 40 (EN 60529).

LCD digital display

Extra large numerals provide for optimum readability of hours, minutes, and seconds, as well as date, abbreviated day of week (8 languages), indoor temperature, and humidity. Manual time zone selection. 1.5 V battery operation.

DCF77

DCF77 radio controlled clock with fully automatic adjustment of time and date at initial operation as well as fully automatic change-over of summer/winter time.

51.115.312

Wall Clocks

Sensible, matter-of-fact wall clocks in an attractive design. And the price is right, too.

Case

- cir. 250 mm diameter
 - cir. 300 mm diameter
- plastic case, choice of white, black or matt silver.
Protection grade IP 40 (EN 60 529).

Front glass

Flat mineral glass.

Face

White face with black Arabic numerals or black DIN bar markings.

Hands

Black bar-type hour and minute hands, red second hand.

avoid error or doubt even at long distances.*

That's all the time you need ...

Wall Clocks with printed bar markings

**Indoor
analog
single face**

Distinctive clocks with high-contrast faces and high-grade stainless steel cases – black bar markings on silver anodised aluminium faces.

Case

■ cir. 300 mm diameter stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) in a matted finish or metal case enamelled in colours (see list below). Protection grade IP 40 (EN 60 529).

Front glass

Domed mineral glass as standard, shock-resistant Plexiglas® XT as an option.

Packaging (Option)

As an option, clockwork packaged to protect it against blown dust and/or sprayed water (IP 54 according to EN 60 529) is available.

Face

Metal face, enamelled silver anodised aluminium with a radial brush finish, high contrast black bar type markings.

Hands

Black bar-type hour and minute hands, black second hand.

No second hand on minute pulse 12...60 V controlled slave clocks.

Power outage reserve

DCF77 radio controlled clocks and AirPort24 slave clocks with a 230 V power supply of this type series provide continued operation for approx. 14 days in case of a mains power outage.

Stainless steel V2A

Due to its components stainless steel V2A is an alloy almost completely impervious to detergents and disinfectants and is therefore excellently suited for the use in the food and pharmaceutical industries, in kitchens, laboratories and other clean rooms. And it looks good into the bargain, as well!

Wall Clocks

single face

Sophisticated clocks for demanding environments – a professional means of showing the time.

Case

- cir. 300 mm diameter
- cir. 400 mm diameter

very sturdy metal case, as standard enamelled charcoal-metallic (dark gun metal, DB 703) or, as an option, enamelled in colours (see list below). As an option, a stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) is available in a matted finish. Protection grade IP 40 (EN 60529).

Snap-tight fixture (option)

As an option, these clocks are available with an additional mounting fixture to prohibit dropping or wrenching off.

Front glass

Domed mineral glass on 300 mm cases, shock-resistant Plexiglas® XT on 400 mm cases. As an option, low reflectivity front glass is available.

Packaging (option)

As an option, clockwork packaged to protect it against blown dust and/or sprayed water (IP 54 according to EN 60529) is available.

Face

Silver anodised with radial brush finish, black fine-line markings. Face printed according to DIN 41091.

Hands

Black bar-type hour and minute hands, black second hand.

No second hand on minute pulse 12...60 V controlled slave clocks.

Power outage reserve

DCF77 radio controlled clocks and AirPort24 slave clocks with a 230 V power supply of this type series provide continued operation for approx. 14 days in case of a mains power outage.

Snap-tight fixture (option)

Indoor analog single face

Type series

240

DCF77 radio controlled clocks

DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.) and under conditions of free radio propagation and may be impaired in heavily reinforced concrete structures. For this case we recommend a removable DCF77 aerial (option).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

NTP
NTP slave clocks require an NTP time server (see page 191).

Elegant clocks, combining faces with Roman numerals and tapered hands with state-of-the-art clockwork technology.

Case

■ cir. 300 mm diameter very sturdy metal case, as standard enamelled white (RAL 9016) or, as an option, enamelled in colours (see list below).

As an option, a stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) is available in a matted finish.

Protection grade IP 40 (EN 60 529).

Snap-tight fixture (option)

As an option, these clocks are available with an additional mounting fixture to prohibit dropping or wrenching off.

Front glass

Domed mineral glass as standard, shock-resistant Plexiglas® XT as an option.

Face

Metal, enamelled white with black Roman numerals.

Hands

Tapered black hour and minute hands, no second hand.

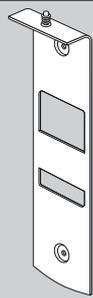

Power outage reserve

DCF77 radio controlled clocks and AirPort24 slave clocks with a 230 V power supply of this type series provide continued operation for approx. 14 days in case of a mains power outage.

Stainless steel V2A (option)

Due to its components stainless steel V2A is an alloy almost completely impervious to detergents and disinfectants and is therefore excellently suited for the use in the food and pharmaceutical industries, in kitchens, laboratories and other clean rooms. And it looks good into the bargain, as well!

Snap-tight fixture (option)

Indoor
analog
single face

Type series

250

51.250.331 shown

Highly presentable clocks for demanding environments – a professional means of showing the time.

Optionally available with case enamelled in colours

Case

- cir. 300 mm diameter
- cir. 400 mm diameter

very sturdy metal case, as standard enamelled metallic silver grey (RAL 9006) or, as an option, enamelled in colours (see list below).
As an option, a stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) is available in a matted finish.
Protection grade IP 40 (EN 60 529).

Snap-tight fixture (option)

As an option, these clocks are available with an additional mounting fixture to prohibit dropping or wrenching off.

Front glass

Domed mineral glass on 300 mm case, shock-resistant Plexiglas® XT on 400 mm case as standard. As an option, low reflectivity front glass is available.

Packaging (option)

As an option, clockwork packaged to protect it against blown dust and/or sprayed water (IP 54 according to EN 60 529) is available.

Face

High distinction white metal with black fine-line markings for easy, doubt-free reading even over longer distances. Face printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hand.

No second hand on minute pulse 12...60 V controlled slave clocks.

Power outage reserve

DCF77 radio controlled clocks and AirPort24 slave clocks with a 230 VAC mains power supply of this type series provide continued operation for approx. 14 days in case of a mains power outage.

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Stainless steel V2A (option)

Due to its components stainless steel V2A is an alloy almost completely impervious to detergents and disinfectants and is therefore excellently suited for the use in the food and pharmaceutical industries, in kitchens, laboratories and other clean rooms. And it looks good into the bargain, as well!

DCF77 radio controlled clocks

DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.) and under conditions of free radio propagation and may be impaired in heavily reinforced concrete structures. For this case we recommend a removable DCF77 aerial (option).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

DCF77 radio controlled clocks

DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.) and under conditions of free radio propagation and may be impaired in heavily reinforced concrete structures. For this case we recommend a removable DCF77 aerial (option).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

¹⁾NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

51.271.311 shown

Wall clocks with sturdy **metal cases**. State-of-the-art, up-to-date, functional – totally reliable!

71.271.311

Slave clock, minute pulse 12...60 V

Case

- cir. 265 mm diameter
- cir. 300 mm diameter
- cir. 400 mm diameter

very sturdy metal case, enamelled white (RAL 9016). Optionally, at a surcharge, enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below.
Protection grade IP 40 (EN 60529).

Front glass

Flat shock-resistant Plexiglas® XT on 265 mm diameter cases, domed mineral glass on 300 mm diameter cases and shock-resistant Plexiglas® XT on 400 mm cases.

Face

High distinction white metal with black Arabic numerals for easy, doubt-free reading even over longer distances. Face printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hand.

No second hand on minute pulse 12...60 V controlled slave clocks.

Power outage reserve

DCF77 radio controlled clocks and AirPort24 slave clocks with a 230 VAC mains power supply of this type series provide continued operation for approx. 14 days in case of a mains power outage.

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Type series

272

81.272.312 shown

Double face clocks for all places where time must be readable from either side. Robust metal, fit everywhere!

Suffix -37

Metal cover for wall or ceiling mounting brackets available as an option

81.272.312 -20 -38

Stainless steel V2A case (available as an option) with optional stainless steel cover for wall or ceiling mounting brackets

Case

- cir. 270 mm diameter
- cir. 320 mm diameter
- cir. 420 mm diameter

very sturdy metal case, enamelled white (RAL 9016). Optionally, at a surcharge, the case may be enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below.

As an option, a stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) is available in a matted finish.

Protection grade IP 40 (EN 60 529).

Mounting

Choice of very sturdy wall or ceiling mounting brackets, standard length cir. 150 mm. For custom lengths or custom mounting options see table below.

Front glasses

Flat, shock-resistant Plexiglas® XT for outstandingly clear visibility.

Faces

High distinction white metal with black Arabic numerals for easy, doubt-free reading even over longer distances. Faces printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hands.

No second hands on DCF77 and AirPort24 radio controlled clocks and on minute pulse 12...60 V controlled slave clocks.

Double face clocks

Double face clocks come completely wired and pre-assembled. Just mount them and plug in – **that's it!**

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Stainless steel V2A (option)

Due to its components stainless steel V2A is an alloy almost completely impervious to detergents and disinfectants and is therefore excellently suited for the use in the food and pharmaceutical industries, in kitchens, laboratories and other clean rooms. And it looks good into the bargain, as well!

Indoor analog double face

Type series

272

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a rotatable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

¹⁾ Alkaline batteries are included in delivery shipment (medium lifespan: cir. 4 years).

²⁾ A rotatable DCF77 receiving aerial is included in delivery shipment.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

All prices are subject to change without notice, packing and shipping cost (see page 203) as well as VAT for deliveries within Germany added. Prices shown as of January 1st, 2017. If you desire additional information, please ask for the detailed type information sheet, quoting the Item Number. Alternatively, access our product data file on the Internet at www.peweta.com.

Indoor Clocks

double face

Indoor
analog
double face

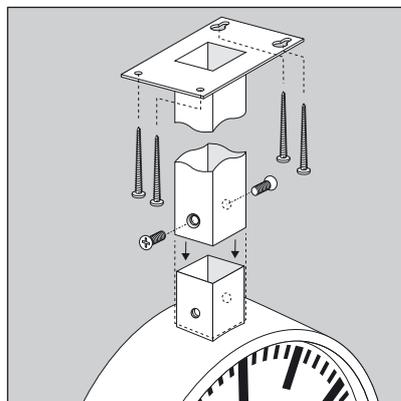

Type series

272

71.272.322 shown

Double face clocks for all places where time must be readable from either side. Robust metal, fit everywhere!

Detachable ceiling mounting in any length desired (e.g. for suspension beneath a false ceiling), available as an option (Suffix -29)

74.272.322 -06 -41

Case enamelled in metallic dark gun metal (DB 703) and red "Railway Station Clock" style second hands available as an option

Case

- cir. 270 mm diameter
- cir. 320 mm diameter
- cir. 420 mm diameter

very sturdy metal case, enamelled white (RAL 9016). Optionally, at a surcharge, the case may be enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below.

As an option, a stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) is available in a matted finish.

Protection grade IP 40 (EN 60 529).

Mounting

Choice of very sturdy wall or ceiling mounting brackets, standard length cir. 150 mm. For custom lengths or custom mounting options see table below.

Front glasses

Flat, shock-resistant Plexiglas® XT for outstandingly clear visibility.

Faces

High distinction white metal with black DIN bar markings for easy, doubt-free reading even over longer distances. Face printed according to DIN 41 091.

Hands

Pointed black bar-type hour and minute hands, red second hands. On synchronous clocks 230 VAC/50 Hz (21.xxx), on slave clocks with minute-/second pulse (72.xxx), and on slave clocks with synchronous second hand (74.xxx), the "Railway Station Clock" style second hand with the "eye" is available as an option.

No second hands on DCF77 and AirPort24 radio controlled clocks and on minute pulse 12...60 V controlled slave clocks.

Double face clocks

Double face clocks come completely wired and pre-assembled. Just mount them and plug in – **that's it!**

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Stainless steel V2A (option)

Due to its components stainless steel V2A is an alloy almost completely impervious to detergents and disinfectants and is therefore excellently suited for the use in the food and pharmaceutical industries, in kitchens, laboratories and other clean rooms. And it looks good into the bargain, as well!

Type series

272

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a rotatable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

DCF77 radio controlled clocks

DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.) and under conditions of free radio propagation and may be impaired in heavily reinforced concrete structures. For this case we recommend a removable DCF77 aerial (option).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

¹⁾NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

71.280.321 shown

Wall clocks with shock-resistant plastic cases. State-of-the-art, up-to-date, functional – totally reliable!

21.280.321 -40

Optionally available with red "Railway Station Clock" style second hand

Case

- cir. 275 x 275 mm
 - cir. 325 x 325 mm
 - cir. 425 x 425 mm
- shock-resistant Plexiglas® XT case with a matted rim.
Protection grade IP 40 (EN 60 529).

Front glass

Shock-resistant Plexiglas® XT for outstandingly clear visibility.

Face

High distinction white metal with black DIN bar markings for easy, doubt-free reading even over longer distances. Face printed according to DIN 41 091.

Hands

Pointed black bar-type hour and minute hands, red second hand. On synchronous clocks 230 VAC/50 Hz (21.xxx), on slave clocks with minute-/second pulse (72.xxx), and on slave clocks with synchronous second hand (74.xxx), the "Railway Station Clock" style second hand with the "eye" is available as an option.

No second hand on minute pulse 12...60 V controlled slave clocks.

Power outage reserve

DCF77 radio controlled clocks and AirPort24 slave clocks with a 230 VAC mains power supply of this type series provide continued operation for approx. 14 days in case of a mains power outage.

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Face printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hand.

No second hand on minute pulse 12...60 V controlled slave clocks.

Power outage reserve

DCF77 radio controlled clocks and AirPort24 slave clocks with a 230 VAC mains power supply of this type series provide continued operation for approx. 14 days in case of a mains power outage.

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Indoor analog single face

Type series

281

DCF77 radio controlled clocks

DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.) and under conditions of free radio propagation and may be impaired in heavily reinforced concrete structures. For this case we recommend a removable DCF77 aerial (option).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

¹⁾NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

Indoor Clocks

double face

Indoor
analog
double face

Type series

282

81.282.312 shown

Double face clocks for all places where time must be readable from either side. Robust metal, fit everywhere!

Suffix -37

Metal cover for wall or ceiling mounting brackets available as an option

81.282.312 -20 -38

Stainless steel V2A case (available as an option) with optional stainless steel cover for wall or ceiling mounting brackets

Case

- cir. 285x285 mm
- cir. 335x335 mm
- cir. 435x435 mm

very sturdy metal case, enamelled white (RAL 9016). Optionally, at a surcharge, the case may be enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below.

As an option, a stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) is available in a matted finish.

Protection grade IP 40 (EN 60 529).

Mounting

Choice of very sturdy wall or ceiling mounting brackets, standard length cir. 150 mm. For custom lengths or custom mounting options see table below.

Front glasses

Flat, shock-resistant Plexiglas® XT for outstandingly clear visibility.

Faces

High distinction white metal with black Arabic numerals for easy, doubt-free reading even over longer distances. Faces printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hands.

No second hands on DCF77 and AirPort24 radio controlled clocks and on minute pulse 12...60 V controlled slave clocks.

Double face clocks

Double face clocks come completely wired and pre-assembled. Just mount them and plug in – **that's it!**

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Stainless steel V2A (option)

Due to its components stainless steel V2A is an alloy almost completely impervious to detergents and disinfectants and is therefore excellently suited for the use in the food and pharmaceutical industries, in kitchens, laboratories and other clean rooms. And it looks good into the bargain, as well!

Indoor analog double face

Type series

282

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a rotatable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

Clocks for Large Spaces

analog · single face, double face, four faces

Large rooms with high ceilings and large halls require large clocks that can be read free of doubt from long distances. Correct time at a single glance. You have our guarantee!

Clocks for Large Spaces

single face, indoor

Large spaces call for large clocks!
Exact time, clearly readable.

Case

■ cir. 500 mm diameter
very sturdy metal case, enamelled white (RAL 9016). Optionally, at a surcharge, enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below.
Protection grade IP 40 (EN 60 529).

Front glass

Domed shock-resistant Plexiglas® XT.
As an option, low reflectivity front glass is available.

Face

High distinction white metal with large black Arabic numerals or large black DIN bar markings for easy, doubt-free reading even over longer distances.
Face printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands.

Red second hand on synchronous clocks (21.xxx), slave clocks with minute/second pulse (72.xxx) and slave clocks with synchronous second hands (74.xxx) only.

332

71.332.522 shown

Double face indoor clocks in an extremely sturdy version – **solid, industrial grade metal cases** with sturdy wall brackets or suspended from the ceiling, shock-resistant Plexiglas® XT front glasses. The best decision for a reliable and durable product!

52.332.513

▲ Ceiling mount double bracket design, optionally available in custom length

74.332.514

Tube version for suspension from the ceiling, tube optionally available in custom length ▶

Case

■ cir. 500 mm diameter, very sturdy metal case, enamelled white (RAL 9016). Optionally, at a surcharge, enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below.

Protection grade IP 40 (EN 60529).

Mounting

Choice of double bracket wall or ceiling mounting, standard bracket length cir. 210 mm, or sturdy metal tube suspension from the ceiling, tube length cir. 500 mm.

Rim and mounting fixtures enamelled metallic dark gun metal (DB 703).

Front glasses

Domed shock-resistant Plexiglas® XT. As an option, low reflectivity front glasses are available.

Faces

High distinction white metal with large black Arabic numerals or large black DIN bar markings for easy, doubt-free reading even over longer distances.

Faces printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands.

Red second hands on synchronous clocks (21.xxx), slave clocks with minute/second pulse (72.xxx) and slave clocks with synchronous second hands (74.xxx) only.

Double face clocks

Double face clocks come completely wired and pre-assembled. Just mount them and plug in – that's it!

Case

- cir. 446 mm diameter
- cir. 546 mm diameter
- cir. 646 mm diameter

very sturdy metal case, enamelled metallic silver grey (RAL 9006) or, as an option, enamelled in dark gun metal (DB 703) or custom enamelled, as listed below.
Protection grade IP 40 (EN 60 529).

Resistance to thrown balls acc. to DIN 18032, part 3 (option)

Clocks of this type series are also available resistant to thrown balls and thus suitable for gymnasiums and other sporting facilities. Very sturdy case with three-point mounting as a safeguard, proof against wrenching of the hook. Front glass is a 2-layer laminated safety glass, 6 mm thick. The clocks are certified and labelled

"resistant to thrown balls according to DIN 18032, part 3".

Front glass

Flat shock-resistant Plexiglas® XT (PMMA) as standard.

Packaging (option)

As an option, clockwork packaged to protect it against blown dust and/or sprayed water (IP 54 according to EN 60 529) is available.

Face

High distinction white metal with large black Arabic numerals for easy, doubt-free reading even over longer distances. Visible face diameter 420 mm, 520 mm and 620 mm respectively. Face printed according to DIN 41 091.

Hands

Pointed black bar-type hour and minute hands according to DIN 41 092.

Red second hand or distinct "Railway Station Clock" style red second hand with "eye" on synchronous clocks (21.xxx), on minute/second pulse clocks (72.xxx) and on clocks with synchronous second hands (74.xxx) only.

"resistant to thrown balls according to DIN 18032, part 3".

Front glass

Flat shock-resistant Plexiglas® XT (PMMA) as standard.

Packaging (option)

As an option, clockwork packaged to protect it against blown dust and/or sprayed water (IP 54 according to EN 60 529) is available.

Face

High distinction white metal with large black DIN bar markings for easy, doubt-free reading even over longer distances. Visible face diameter 420 mm, 520 mm and 620 mm respectively. Face printed according to DIN 41 091.

Hands

Pointed black bar-type hour and minute hands according to DIN 41 092.

Red second hand or distinct "Railway Station Clock" style red second hand with "eye" on synchronous clocks (21.xxx), on minute/second pulse clocks (72.xxx) and on clocks with synchronous second hands (74.xxx) only.

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a remobile DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

Outdoor clocks resistant to thrown balls

see pages 162 and 163.

¹⁾ Alkaline batteries are included in delivery shipment (medium lifespan: cir. 4 years).

²⁾ A remobile DCF77 receiving aerial is included in delivery shipment.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

Also available
“resistant
to thrown balls”

72.369.510 shown

Clocks of this type series are excellently suited for all applications requiring large clocks with **solid, industrial grade metal cases** mounted flush with a wall surface.

Also available in a version resistant to thrown balls, according to DIN 18032, part 3.

72.369.510 -22

▲ Clock cases made of stainless steel V4A, blasted and varnished (optional) are resistant to saline or chlorous media. Excellently suited for permanent use in public swimming pools.

Case

- Faceplate cir. 460x460 mm
- Faceplate cir. 560x560 mm
- Faceplate cir. 660x660 mm

very sturdy metal case for flush mounting in walls, enamelled white (RAL 9016). Optionally, at a surcharge, enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below. A stainless steel case (1.4571 X6CrNiMoTi 17-12-2, German trade name V4A), blasted and additionally coated with a protective varnish, is available as an option. Protection grade IP 40 (EN 60 529).

Mounting

These clocks are to be mounted flush with the wall surface and require a recess of (W x H x D)

- cir. 406x406x80 mm
- cir. 506x506x80 mm
- cir. 606x606x80 mm.

Resistance to thrown balls acc. to DIN 18 032, part 3 (option)

Clocks of this type series are also available resistant to thrown balls and thus suitable for schools, gymnasiums and other sporting facilities. Very sturdy metal case with 6 mm two-ply laminated mineral safety glass. These clocks conform to German Industry Standard and are certified and labelled "resistant to thrown balls according to DIN 18 032, part 3".

Front glass

Flat shock-resistant Plexiglas® XT (PMMA) as standard.

Packaging (option)

As an option, clockwork packaged to protect it against blown dust and/or sprayed water (IP 54 according to EN 60 529) is available.

Face

High distinction white metal with large black Arabic numerals for easy, doubt-free reading even over longer distances. Visible print diameters are cir. 335 mm, 420 mm, and 503 mm respectively. Face printed according to DIN 41 091.

Hands:

Black bar-type hour and minute hands. Red second hand on minute/second pulse slave clocks (72.xxx) and on clocks with synchronous second hands (74.xxx) only.

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Stainless steel V4A + varnish (option)

V4A quality stainless steel with an additional coat of protective varnish is outstandingly resistant to acids and other chlorous media and is therefore particularly suited for public swimming pools as well as for the chemical industry.

■ stainless steel V4A + clear varnish	-22

⁽¹⁾ Alkaline batteries are included in delivery shipment (medium lifespan: cir. 4 years).

⁽²⁾ A remutable DCF77 receiving aerial is included in delivery shipment.

⁽³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

All prices are subject to change without notice, packing and shipping cost (see page 203) as well as VAT for deliveries within Germany added. Prices shown as of January 1st, 2017. If you desire additional information, please ask for the detailed type information sheet, quoting the Item Number. Alternatively, access our product data file on the Internet at www.peweta.com.

Clocks for Large Spaces

double face, indoor

Large space
analog
double face

Type series

372

21.372.512 shown

Double face indoor clocks with **solid, industrial grade metal cases** with sturdy wall brackets or suspended from the ceiling, shock-resistant Plexiglas® XT front glasses. The best decision for a reliable and durable product!

21.372.512 -22

▲ Clock cases made of stainless steel V4A, blasted and varnished (optional) are resistant to saline or chlorous media. Excellently suited for permanent use in public swimming pools.

Case

- cir. 400x400 mm
- cir. 500x500 mm
- cir. 600x600 mm

very sturdy metal case enamelled white (RAL 9016). Optionally, at a surcharge, custom enamelled, as listed below. A stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A) with a matted finish or a stainless steel case (1.4571 X6CrNiMoTi 17-12-2, German trade name V4A), blasted and additionally coated with a protective varnish, are available as options. Protection grade IP 40 (EN 60 529).

Mounting

Choice of double bracket wall or ceiling mounting, enamelled white, standard bracket length cir. 250 mm. Also available with lugs for suspension by ropes or chains as an option for larger ceiling heights.

Front glass

Flat shock-resistant Plexiglas® XT (PMMA).

Packaging (option)

As an option, clockwork packaged to protect it against blown dust and/or sprayed water (IP 54 according to EN 60 529) is available.

Faces

High distinction white metal with large black Arabic numerals for easy, doubt-free reading even over longer distances. Visible print diameters are 335 mm, 420 mm, and 503 mm respectively. Faces printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands. Red second hand on synchronous clocks (21.xxx), slave clocks with minute/second pulse (72.xxx) and slave clocks with synchronous second hands (74.xxx) only.

Double face clocks

Double face clocks come completely wired and pre-assembled. Just mount them and plug in – that's it!

Plexiglas® XT

Plexiglas® XT is i. a. suited for use in food-processing plants.

Stainless steel V2A (option)

Due to its components stainless steel V2A is an alloy almost completely impervious to detergents and disinfectants and is therefore excellently suited for the use in the food and pharmaceutical industries, in kitchens, laboratories and other clean rooms. And it looks good into the bargain, as well!

Stainless steel V4A + varnish (option)

V4A quality stainless steel with an additional coat of protective varnish is outstandingly resistant to acids and other chlorous media and is therefore particularly suited for public swimming pools as well as for the chemical industry.

- edge length cir. 500 mm, with four round faces, diameter cir. 400 mm
 - edge length cir. 625 mm, with four round faces, diameter cir. 500 mm
- sturdy metal cube, enamelled in white (RAL 9016) as standard. Optionally, at a surcharge, case and/or clock rims enamelled in custom colours. A large hinged inspection flap on the top provides easy access for maintenance. Protection grade IP 40 (EN 60 529).

Mounting

This clock cube will usually be suspended from the ceiling by metal ropes or chains. Due to varying requirements, ropes or chains are to be procured locally. Four ringbolts are provided on the top of the case.

Front glasses

Domed shock-resistant Plexiglas® XT (PMMA). As an option, low reflectivity front glasses are available.

Faces

High distinction white metal with large black Arabic numerals or large black DIN bar markings for easy, doubt-free reading even over longer distances. Visible face diameter cir. 400 mm and cir. 500 mm respectively.

Faces printed according to DIN 41 091

Hands

Black bar-type hour and minute hands. Red second hands or distinct red "Railway Station Clock" style second hands with "eye" on minute/second pulse clocks (72.xxx) and on clocks with synchronous second hands (74.xxx) only.

Clock cubes come completely wired and pre-assembled. Just mount them and plug in – that's it!

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a removable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24
PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24
PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP
NTP slave clocks require an NTP time server (see page 191).

Special clocks

Whether you look for dust-, water- or vapour-proof clocks (acc. to IP grade 64), clocks for high temperatures in sauna cabins, pace clocks indicating split times or clocks for surgical operating rooms in hospitals or other "clean room" applications – on the following pages you will find clocks for all specific requirements ...

Wall Clocks

waterproof, steam proof, dust proof

These clocks are packaged in waterproof, steam proof and dust proof cases and thus perfectly suitable for "critical" areas with blown dust and water thrown in sheets or other demanding environments.

They are not suitable for sauna cabins. Sauna clocks may be found on page 103 only.

Case

■ cir. 300 mm diameter
white plastic case, dust- and water-proof according to IP 64 (EN 60 529).

Front glass

Flat mineral glass, black sealing ring. Also available with shock-resistant Plexiglas® XT (option).

Face

White face with large black Arabic numerals for easy, doubt-free reading even over longer distances.

Hands

Black bar-type hour and minute hands, red second hand.

DCF77 radio controlled clocks

DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.) and under conditions of free radio propagation and may be impaired in heavily reinforced concrete structures.

Wall Clock

soundless, for relaxation rooms

Wall clock in a wooden case with soundless Quartz clockwork and creeping second hand. Excellently suited for relaxation rooms within spa facilities (**not suitable for sauna cabins**. Sauna clocks may be found on page 103 only).

Case

- cir. 220 mm diameter
- Ayous wood.
- Protection grade IP 40 (EN 60 529).

Front glass

- Domed mineral glass.

Face

- Metal, enamelled white with large black Arabic numerals.

Hands

- Black bar-type hour and minute hands, red second hand.

- soundless clockwork

Wall Clocks

heat resistant, for sauna cabins

Special clockworks and specially treated wooden cases facilitate professional use of these clocks in private or public saunas.

Explicitly suited for the use in sauna cabins (up to cir. 110 °C).

Case

- cir. 150 mm diameter
- cir. 220 mm diameter
- cir. 230x230 mm

Special Ayous wood will not crack even under most severe fluctuations of temperature and humidity. Protection grade IP 40 (EN 60529).

Front glass

Heat resistant mineral glass.

Face

Metal, enamelled white with large black Arabic numerals.

Hands

Black bar-type hour and minute hands, red second hand.

No second hand on 24 V minute pulse controlled slave clocks.

Training Clocks/Pace Clocks for indoors water protected, with seconds cross

Indoor
analog
single face

Type series

430

Also available
"resistant
to thrown balls"

41.430.611 shown

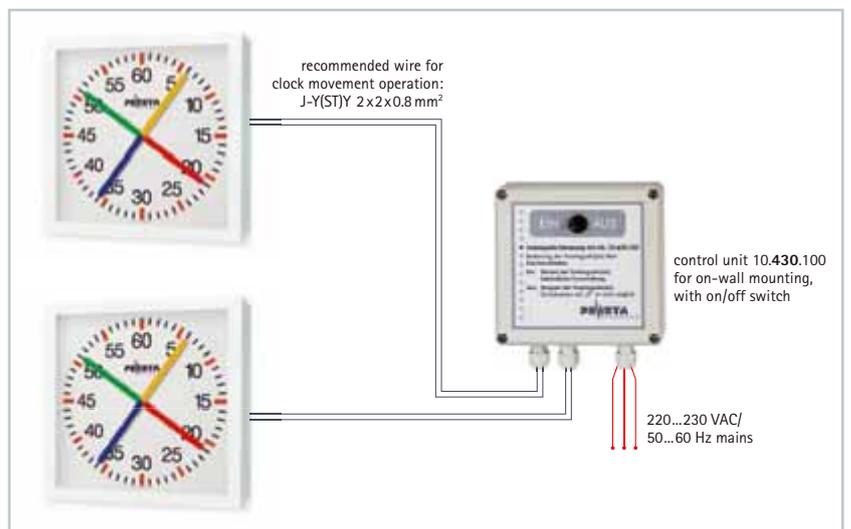

This kind of training/pace clock indicates split times during swim training/warm-up training. Times are taken by each swimmer individually. The 4-coloured seconds cross indicates the time elapsed, one complete turn corresponds to exactly 60 seconds.

For parallel operation of 2...4 training clocks, the slave clock type connected to the central control unit 10.430.100 is recommended. Thus an identical display (synchronous time) is always guaranteed on all training clocks connected.

Backlighted training clocks

for indoors and outdoors see pages 174 and 175.

Diagram shows 2 training clocks 71.431.611 with control unit 10.430.100

Case

■ cir. 600x600 mm
very sturdy metal case, enamelled white (RAL 9016). Optionally, at a surcharge, enamelled in metallic silver grey (RAL 9006), in dark gun metal (DB 703) or custom enamelled, as listed below. A stainless steel case (1.4571 X6CrNiMoTi 17-12-2, German trade name V4A), blasted and additionally coated with a protective varnish, is available as an option. Clock movement protected according to IP54 (EN 60529).

Resistance to thrown balls acc. to DIN 18032, part 3 (option)

Wrench-off-proof mounting fixture and two-ply laminated mineral safety glass, thus suitable for ball sports facilities when durably mounted on-wall.

Clock types

■ Quartz movement, battery operated (2x1.5 V "Alkaline" LR 20, included).

Portable, therefore suitable for mobile use.

ON/OFF switch on reverse side. With carrying handle. Setup on the edge of the pool. 2 pivoted feet ensure a firm position of clock on the ground. Or wall mounting.

■ Quartz movement, mains operated 230 VAC. **Recommended for continuous operation and for durable, fixed on-wall position.** Wall mounting and fixed power supply only, incl. wrench-off-proof 3-point mounting fixture.

■ Slave movement, pulse operated 24 V. To be operated by fixed connection to control unit 10.430.100 only.

Recommended for synchronized, parallel operation of up to 4 training clocks/pace clocks 71.430.611 in securely fixed positions. Wall mounting only, incl. 3-point wrench-off-proof mounting fixture. Control unit 10.430.100 is required for operation.

42.430.611 -22

Face

High distinction white metal with red/black second bars and black numerals for easy, doubt-free reading. Reading distance cir. 30 m.

Hands

4-coloured seconds cross, intervals in second cycles.

Front glass

Flat shock-resistant Plexiglas® XT (PMMA) as standard

Function

The (swim) training/pace clock can be used by any number of swimmers simultaneously.

The crossed second hands show the time elapsed in seconds.

The swimmer will wait for a maximum of 14 seconds until the next colour of the four second hands ("his" colour) reaches the 12-o'clock-position and will then memorise the colour of "his" hand.

Upon reaching the edge of the pool (after 1 or 2 laps) the time elapsed can be read according to the position of "his" second hand.

Stainless steel V4A + varnish (option)

V4A quality stainless steel with an additional coat of protective varnish is outstandingly resistant to acids and other chlorous media and is therefore particularly suited for public swimming pools as well as for the chemical industry.

Recommended for synchronized, parallel operation of up to 4 training clocks/pace clocks 71.430.611 in securely fixed positions.

Wall mounting only, incl. 3-point wrench-off-proof mounting fixture. Control unit 10.430.100 is required for operation.

Face

High distinction white metal with red/black minute and second bars and black numerals for easy, doubt-free reading. Reading distance cir. 30 m.

Hands

Black minute hand. Red second hand with "eye", intervals in second cycles.

Front glass

Flat shock-resistant Plexiglas® XT (PMMA) as standard.

Function

The (swim) training/pace clock can be used by any number of swimmers simultaneously.

The elapsed time is displayed in minutes and seconds.

The swimmer will wait for a maximum of 59 seconds until the second hand reaches the 12-o'clock-position and will then memorise the position of the minute hand.

Upon finishing a training round the time elapsed can be easily calculated (time indicated minus the minutes memorised).

Stainless steel V4A + varnish (option)

V4A quality stainless steel with an additional coat of protective varnish is outstandingly resistant to acids and other chlorous media and is therefore particularly suited for public swimming pools as well as for the chemical industry.

flush-mounted

Type series
460

73.460.310 shown
for mounting in conventional brick-and-plaster walls

These round analog clocks with stainless steel V4A cases were designed with the surgical operating room in mind. Mounted in-wall, flush with the surface, these reliable and accurate clocks meet all hygienic standards. Also suitable for all other demanding environments such as the pharmaceutical, beverage and food industries.

Metal mounting frame 01.460.300
for in-wall mounting in conventional brick walls
(flush with tiles or plaster)

Clock 73.460.310 for in-wall mounting
with spring-clip attachment device 01.460.301
for stud-and-panel wall mounting

Case

- cir. 301 mm diameter
- cir. 401 mm diameter

very high grade stainless steel case (1.4571 X6CrNiMoTi 17-12-2, German trade name V4A), for mounting flush with wall tiles or plaster. Visible surface with a matted finish, resistant to acids, detergents and disinfectants. In mounted condition protected against dust and moisture to IP 54 (EN 60 529).

Mounting

- built-in/plaster
- in stud-and-panel wall

A metal mounting frame for conventional brick walls or a spring-clip device for stud-and-panel walls is supplied with the clock.

Front glass

Flat mineral glass, 3 mm. Optionally treated for low reflectivity.

Face

High distinction white metal with black Arabic numerals. Face printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hand.
No second hands on minute pulse 12...60 V controlled slave clocks.

Stainless steel V4A

Due to its components stainless steel V4A is not only completely impervious to detergents and disinfectants but also to acids and other aggressive media. The flush-mounted clocks of this type series are therefore particularly suited for the use surgical operating rooms and other clean rooms.

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a rotatable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

¹⁾A rotatable DCF77 receiving aerial (IP 68) is included in delivery shipment.

²⁾NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

Analog Clocks for In-Wall Mounting

with digital stopwatch display, ideal for surgical operating rooms

Indoor
analog/digital
flush-mounted

Type series

480

73.480.310 shown

These analog clocks with LED digital stopwatch display with stainless steel V4A cases were designed with the surgical operating room in mind. Mounted in-wall, flush with the surface, these reliable and accurate clocks meet all hygienic standards. Also suitable for all other demanding environments such as the pharmaceutical, beverage and food industries.

02.498.101

02.498.102

For operating the stopwatch mode of the LED digital display we provide different remote control units in stainless steel cases. For a detailed product description please see page 126.

Case

■ cir. 301 x 387 mm
very high grade stainless steel case (1.4571 X6CrNiMoTi 17-12-2, German trade name V4A), for mounting flush with wall tiles or plaster. Visible surface with a matted finish, resistant to acids, detergents and disinfectants. In mounted condition protected against dust and moisture to IP 54 (EN 60 529).

Mounting

■ built-in/plaster
■ in stud-and-panel wall
■ on-wall mounting (optional)
A metal mounting frame for conventional brick walls or a spring-clip device for stud-and-panel walls is supplied with the clock. Optionally, at a surcharge, the clock may also be configured for on-wall mounting.

Front glass

Flat mineral glass, 3 mm. Glass on digital display is treated for low reflectivity. On analog face, low reflective glass is available as an option.

Face

High distinction white metal with black Arabic numerals. Face printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hand.
No second hands on minute pulse 12...60 V controlled slave clocks.

LED digital display

6-digit 7-segment LED bars, digit colour red (option: amber or green). Digit height 25 mm. Automatic brightness control. Power supply is 230 V AC mains as standard, 12 V DC (option). Power loss reserve: Time telegram/pulse storage to cover cir. 100 hours.

Stopwatch mode

The 6-digit display will show hours, minutes and seconds, counting up from start. The stopwatch system is controlled by a remote control unit (as an extra), for technical data see page 126.

Stainless steel V4A

Due to its components stainless steel V4A is not only completely impervious to detergents and disinfectants but also to acids and other aggressive media. The flush-mounted clocks of this type series are therefore particularly suited for the use surgical operating rooms and other clean rooms.

DCF77 radio controlled clocks
DCF77 radio controlled clocks of this type series will be supplied including a removable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24
PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24
PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP
NTP slave clocks require an NTP time server (see page 191).

¹⁾ A removable DCF77 receiving aerial (IP 68) is included in delivery shipment.

²⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

Analog Clocks for In-Wall Mounting

with digital stopwatch display, ideal for surgical operating rooms

Indoor
analog/digital
flush-mounted

Type series
480

73.480.320 shown

These analog clocks with LED digital stopwatch display with stainless steel V4A cases were designed with the surgical operating room in mind. Mounted in-wall, flush with the surface, these reliable and accurate clocks meet all hygienic standards. Also suitable for all other demanding environments such as the pharmaceutical, beverage and food industries.

02.498.101

02.498.102

For operating the stopwatch mode of the LED digital display we provide different remote control units in stainless steel cases. For a detailed product description please see page 126.

Case

■ cir. 301 x 387 mm
very high grade stainless steel case (1.4571 X6CrNiMoTi 17-12-2, German trade name V4A), for mounting flush with wall tiles or plaster. Visible surface with a matted finish, resistant to acids, detergents and disinfectants. In mounted condition protected against dust and moisture to IP 54 (EN 60 529).

Mounting

■ built-in/plaster
■ in stud-and-panel wall
■ on-wall mounting (optional)
A metal mounting frame for conventional brick walls or a spring-clip device for stud-and-panel walls is supplied with the clock. Optionally, at a surcharge, the clock may also be configured for on-wall mounting.

Front glass

Flat mineral glass, 3 mm. Glass on digital display is treated for low reflectivity. On analog face, low reflective glass is available as an option.

Face

High distinction white metal with black DIN bar markings. Face printed according to DIN 41 091.

Hands

Black bar-type hour and minute hands, red second hand.
No second hands on minute pulse 12...60 V controlled slave clocks.

LED digital display

6-digit 7-segment LED bars, digit colour red (option: amber or green). Digit height 25 mm. Automatic brightness control. Power supply is 230 V AC mains as standard, 12 V DC (option). Power loss reserve: Time telegram/pulse storage to cover cir. 100 hours.

Stopwatch mode

The 6-digit display will show hours, minutes and seconds, counting up from start. The stopwatch system is controlled by a remote control unit (as an extra), for technical data see page 126.

Stainless steel V4A

Due to its components stainless steel V4A is not only completely impervious to detergents and disinfectants but also to acids and other aggressive media. The flush-mounted clocks of this type series are therefore particularly suited for the use surgical operating rooms and other clean rooms.

LED Digital Clocks for In-Wall Mounting

with stopwatch mode (optional), ideal for surgical operating rooms

Indoor digital flush-mounted

Type series
490

These LED digital clocks with stainless steel V4A cases were designed with the surgical operating room in mind. They are mounted in-wall, flush with the surface, to meet all hygienic standards.

Configured in this type of case or in any other case adapted to customer's wishes, e. g.

- for on-wall mounting,
- for desk-top use or
- as a double faced clock,

these clocks can be used in any demanding environment, such as the pharmaceutical, beverage and food industries, requiring accurate and dependable time information.

83.490.550 shown

2 x 83.490.550 -89 and 01.490.503 shown

Double faced clock with ceiling bracket, stainless steel V4A

02.498.101

02.498.102

For operating the stopwatch mode (option) we provide different remote control units in stainless steel cases. For a detailed product description please see page 126.

Case

■ cir. 455 x 150 mm, very high grade stainless steel case (1.4571 X6CrNiMoTi 17-12-2, German trade name V4A), for mounting flush with wall tiles or plaster. Visible surface with a matted finish, resistant to acids, detergents and disinfectants. In mounted condition protected against dust and moisture to IP 54 (EN 60 529).

Mounting

- built-in/plaster
- in stud-and-panel wall
- on-wall mounting (optional)
- double faced clocks may be suspended from the ceiling on brackets (optional).

A metal mounting frame for conventional brick walls or a spring-clip device for stud-and-panel walls is supplied with the clock. Optionally, at a surcharge, the clock may also be configured for on-wall mounting or as a double faced version.

LED digital display

6-digits, 2 each for hours, minutes and seconds. 7-segment LED bars, red as standard, amber or green as options. Digit height 57 mm for hour, minute and second. Second digit height 38 mm as an option. Automatic brightness control. Readability is excellent even at extremely sharp angles.

Front glass

Flat mineral glass, 3 mm, treated for low reflectivity.

Power supply

230 VAC/50 Hz is standard, 12 VDC mains is optional. Under specific circumstances, the bus voltage may suffice to operate PEWETA *DCFport24* version clocks²⁾. Existing 2-wire or 4-wire slave clock bus lines may be re-used for 12 VDC or PEWETA *DCFport24* versions.

¹⁾ A remountable DCF77 receiving aerial (IP 68) is included in delivery shipment.

²⁾ Limited number of clocks within a system/network.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

⁴⁾ NTP slave clocks require a LAN connection. Appropriate hardware has to be supplied by customer.

Stopwatch mode (optional)

These clocks can be fitted with a count up/split time stopwatch mode. The 6-digit LED display will show hours, minutes and seconds, counting up from start. The stopwatch system is controlled by a wire-based remote control unit (as an extra), for technical data see page 126.

Stainless steel V4A

Due to its components stainless steel V4A is not only completely impervious to detergents and disinfectants but also to acids and other aggressive media. The flush-mounted clocks of this type series are therefore particularly suited for the use surgical operating rooms and other clean rooms.

Remote Control

ideally suited for surgical operating room in-wall clocks (digital or analog/digital)

Remote control
flush-mounted
or hand-held

Type series

498

These control units (wire-bound remote controls) were specially developed for use in hospital surgical operating rooms – flush with wall tiles, no hygienic limitations, reliable and accurate! Also usable in other clean-room environments, such as pharmaceutical, beverage or food industries.

Case

Flush-with-tiles/wall surface stainless steel V4A (1.4571 X6CrNiMoTi 17-12-2) mounting frame for in-wall mounting, visible surfaces with a matted finish (K240), specially resistant to acids, detergents and disinfectants. In mounted condition protected against dust and moisture to IP 54 (EN 60 529).

Mounting

- built-in/plaster
- in stud-and-panel wall
- hand-held

The built-in version is supplied with either a mounting frame for mounting in conventional brick-and-plaster walls or a spring clip attachment device for stud-and-panel walls. A hand-held version is also available. For dimensions please see table.

Functions

- switching between clock and stop-watch function
- start/stop (counting upwards)
- split times
- reset

When used with PEWETA LED-OP-in-wall clocks, no separate power supply is required. Connected to clock by 4-core-wire, such as LIYCY-0 4x0.25 mm² (standard length of cir. 5 m is supplied with control unit).

Digital Clocks

indoor · single- and double-sided

"Thirteen fortyfive" – contrary to analog clocks, digital clocks soundlessly indicate the time in a 24-hour mode.

This is particularly recommended for radio stations and TV studios, in world time clock systems and for places of high publicity, e.g. bank areas – locations where exact time should be shown in combination with the date.

LED Digital Clocks

for offices, production areas, and places of high publicity

Case

- cir. 320x150x34 mm (cipher height 57 mm)
 - cir. 520x250x43 mm (cipher height 100 mm)
- Extra flat, very sturdy metal case, enamelled black (RAL 9005). Protection grade IP 40 (EN 60 529).

Mounting

- Single-sided version for on-wall mounting, optionally with an additional, sturdy wall or ceiling mounting bracket (accessory)
- Double-sided version includes sturdy wall or ceiling mounting bracket.

LED digital display

- cipher height 57 mm
 - cipher height 100 mm
- Single line display showing hours and minutes, 4 digits, bar-type 7-segment LED ciphers, colour red (optionally amber, green or blue at a surcharge). Automatic brightness control. Menu selection for hour offset and suppression of leading zero. Minimum 100 hours data retention in case of power loss. Operating voltage 230 VAC/50...60 Hz (12 VDC/AC optional). Under specific circumstances, the bus voltage may suffice to operate PEWETA *DCFport24* version clocks²⁾.

Front glass

Flat acrylic glass.

Double-sided LED digital clocks

Double-sided clocks come completely wired and pre-assembled. All settings will be taken over by both sides automatically!

Indoor digital single- and double-sided

Type series

510

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a removable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

¹⁾ A removable DCF77 receiving aerial is included in delivery shipment.

²⁾ Due to power consumption the number of clocks within the system/network is limited. Please ask for details when interested.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

⁴⁾ NTP slave clocks require a LAN connection. Appropriate hardware has to be supplied by customer.

LED Digital Clocks

for offices, production areas, and places of high publicity

Indoor
digital
single- and
double-sided

Type series
511

81.511.551 shown

LED digital clocks, single- or double-sided with distinct, brightly lit LED bars guarantee optimal reading clearness.

43.548.151 shown

71.511.553 -89 shown

Case

- cir. 440x150x34 mm (cipher height 57 mm)
 - cir. 770x250x43 mm (cipher height 100 mm)
- Extra flat, very sturdy metal case, enamelled black (RAL 9005). Protection grade IP 40 (EN 60 529).

Mounting

- Single-sided version for on-wall mounting, optionally with an additional, sturdy wall or ceiling mounting bracket (accessory)
- Double-sided version includes sturdy wall or ceiling mounting bracket.

LED digital display

- cipher height 57 mm (option: 38 mm for seconds)
 - cipher height 100 mm
- Single line display showing hours, minutes and seconds, 6-digits, bar-type 7-segment LED ciphers, colour red (optionally amber, green or blue at a surcharge). Automatic brightness control. Menu selection for hour offset and suppression of leading zero. Minimum 100 hours data retention in case of power loss. Operating voltage 230 VAC/50...60 Hz (12 VDC/AC optional). Under specific circumstances, the bus voltage may suffice to operate PEWETA DCFport24 version clocks²⁾.

Stopwatch mode (option)

This clock can be fitted with an additional stopwatch mode (count-up/count-down/split times). This mode is controlled by a wire-bound »Basic plus« control unit (accessory). For technical details see page Seite 145.

Front glass

Flat acrylic glass.

Double-sided LED digital clocks

Double-sided clocks come completely wired and pre-assembled. All settings will be taken over by both sides automatically!

LED Digital Clocks with rim-circle seconds indication ideal for broadcasting facilities and places of high publicity

Indoor
digital
single-sided

Type series
525

83.525.551 -77 shown

83.525.551 -77 shown

83.525.551 -75 -77 shown

83.525.551 -77 -88 shown

This 400 mm diameter wall clock as standard shows the digital time in hours and minutes and has a circumferential ring of red LED bar marks that show the seconds, counting up. An additional 8-character alphanumeric LED display line makes this clock a veritable "information centre". Depending on the features selected this clock is capable of providing all the information required for the assigned function – exact, professional, attractive, and outright reliable!

Possible indications:

- 8-digit date display (24.09.2018)
- day of the week, spelled out (Monday)
- day of the week, abbreviated and date (Mon 24.09.)
- day of month and abbreviated month (24. Sep 18), multilingual
- additional display for seconds (48)
- stopwatch function (hh/mm/ss)
- temperature (20°C)
- city names at customer's choice with corresponding world time and time-zone details (city pre-sets, see pages 140 and 141).

Whether as a single clock, as a calendar clock full of information or integrated as "master" or "slave" in a World Time Display System – this clock speaks all languages and meets all demands!

Case

■ cir. 400 mm diameter metal, as standard enamelled jet black (RAL 9005). Optionally, at a surcharge, custom enamelled or with stainless steel case (1.4301 X5CrNi 18-10, German trade name V2A), in a matted finish.

Protection grade IP 40 (EN 60529).

LED digital display(s)

4-digit hour and minute display, bar-type 7-segment LED ciphers, height 57 mm, colour red. Circumferential ring of red LED bars indicating the seconds, counting up. Automatic brightness control. Hour offset or leading zero selectable via menu. Minimum 100 hours data retention in case of power loss. Operating voltage 230 VAC/50...60 Hz (12 VDC/12 VAC optional). Under specific circumstances, the bus voltage may suffice to operate PEWETA DCFport24 version clocks²⁾.

Alphanumeric display (option)

16-segment alphanumeric LED bar character display, up to 8 characters, character height 30 mm, to display numeric and alphanumeric information, e. g. day of the week, month, date, and seconds. At a surcharge, split and end times (stopwatch mode, option) or city names (option), can be displayed. Selection via menu. Alternating display possible. Various languages.

Front glass

Flat, shock-resistant Plexiglas®.

World Time Display System (option)

PEWETA LED digital clocks can be integrated into a professional and intelligent World Time Display System by the PEWETA *digital RS 485* data bus. Each individual LED digital clock receives the "pre-sets" pertaining to various time zones and city names. Upon selection of a time zone, local time will be displayed, regarding zone offset and local change-over dates for summer and winter time.

Stopwatch mode (option)

These clocks can be fitted with a count up/count down/split time stopwatch mode. The 8-digit alphanumeric display (option) will show hours, minutes and seconds, counting up from start or down from a pre-selected value. The stopwatch system is controlled by a remote control unit (as an extra), for technical data see page 145.

525

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a remotable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

¹⁾ A remotable DCF77 receiving aerial is included in delivery shipment.

²⁾ Due to power consumption the number of clocks within the system/network is limited. Please ask for details when interested.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

⁴⁾ NTP slave clocks require a LAN connection. Appropriate hardware has to be supplied by customer.

83.526.551 -77 -88 shown

This 400x400 mm wall clock as standard shows the digital time in hours and minutes and has a circumferential ring of red LED bar marks that show the seconds, counting up. An additional 8-character alphanumeric LED display line makes this clock a veritable "information centre". Depending on the features selected this clock is capable of providing all the information required for the assigned function – exact, professional, attractive, and outright reliable!

Possible indications:

- 8-digit date display (24.09.2018)
- day of the week, spelled out (Monday)
- day of the week, abbreviated and date (Mon 24.09.)
- day of month and abbreviated month (24. Sep 18), multilingual
- additional display for seconds (48)
- stopwatch function (hh/mm/ss)
- temperature (20°C)
- city names at customer's choice with corresponding world time and time-zone details (city pre-sets, see pages 140 and 141).

Whether as a single clock, as a calendar clock full of information or integrated as "master" or "slave" in a World Time Display System – this clock speaks all languages and meets all demands!

42.535.521 shown

42.535.531 shown

These PEWETA World Time Displays can be used as stand-alone units as well as combined with further LED World Time Displays into an integrated system. Permanent text overlays below the time displayed indicate the names of the cities chosen. The software already contains the "pre-sets" pertaining to various time zones and city names, so that all units can easily be set up to always show the correct time.

42.535.911 shown

LED digital clock, 4 digits, cipher height 100 mm, local time display

Case

- cir. 520x250x43 mm
 - cir. 770x250x43 mm
- sturdy metal case for on-wall mounting, as standard enamelled jet black (RAL 9005). Optionally, at a surcharge, custom enamelled.
Protection grade IP 40 (EN 60529).

LED digital display

- Cipher height 57 mm, 4 digits, for world time displays
- Cipher height 100 mm, 4 or 6 digits, for local time displays

bar-type 7-segment LED ciphers, colour red (optionally, at a surcharge, amber, green or blue), automatic brightness control. Hour offset or leading zero may be selected via menu. Minimum 100 hours data retention in case of power loss. Operating voltage 230 VAC/50...60 Hz.

Front glass

Flat acrylic glass

City "pre-set"

City "pre-sets" turn any PEWETA LED digital clock into an intelligent, professional World Time Clock. Each display unit will receive a custom "pre-set" according to the name of the city chosen by the customer. This setting includes the individual time zone and the individual dates for change-over from summer to winter time and vice versa. Manual adjustment by menu is possible.

Alphanumeric LED digital display (option)

Alphanumeric LED digital display for city names instead of text overlays. 16-segment LED readout, max. 8 characters, character height 30 mm. The time zone desired and the name of the city are set by internal menu and may be changed at any time.

Case options

On request, we offer further case variations for our LED World Time Clocks. Everything is possible: **stainless steel front panels**, cases for **in-wall mounting** or **double-sided** displays! Tell us about your requirements and we will be pleased to submit our quotation.

For flush panel mounting, face plate stainless steel (1.4301 X5CrNi 18/10, German trade name V2A), matted finish, acrylic front glass.
W x H x D: cir. 257 x 64 x 77 mm.
Protection grade IP 40 (EN 60 529).

LED digital display

Display of hours, minutes, and seconds, 6 digits, bar-type 7-segment LED ciphers, height 25 mm, colour red. Automatic brightness control. Configurable as time display or for count-up/count-down function (option). Hour offset or leading zero may be selected via menu. Minimum 100 hours data retention in case of power loss. Operating voltage 230 VAC/50...60 Hz (12 V DC/AC optional). Under specific circumstances, the bus voltage may suffice to operate PEWETA DCFport24 version clocks²⁾.

Stopwatch mode (option)

These clocks can be fitted with a count up/count down/split time stopwatch mode. The 6-digit numeric display (option) will show hours, minutes and seconds, counting up from start or down from a pre-selected value. The stopwatch system is controlled by a remote control unit (as an accessory), for technical data see page 145.

Options – just as you like them ...

These clocks are available optionally with customised features at the surcharges as listed. Just pick your option(s) and add the appropriate suffix(es) to the Item No.

¹⁾ A removable DCF77 receiving aerial is included in delivery shipment.

²⁾ Due to power consumption the number of clocks within the system/network is limited. Please ask for details when interested.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

⁴⁾ NTP slave clocks require a LAN connection. Appropriate hardware has to be supplied by customer.

Remote Control Unit

for LED digital clocks equipped with stopwatch mode

This active, wire-bound "BASIC plus" remote control unit is capable of turning PEWETA LED digital clocks, via data bus interfaces *digital RS 485*, into stopwatches (stopwatch mode is an option) and acts as a terminal for their operation. The data bus system enables synchronous count-up/count-down functions of all connected LED digital clocks. Since each clock within the system can be addressed individually, one remote control unit can control several stopwatches in various locations or several remote control units, e. g. at different work stations, can simultaneously trigger one LED stopwatch (see page 9). These functions can, by means of software, be flexibly defined and can be easily selected by the user.

Case

Sturdy plastic tip-up case for desktop use. 12-button numeric keypad, 6 digits (hh/mm/ss), bar-type 7-segment LED ciphers, cipher height 13 mm, colour red. Interface wire length cir. 2 m. Dimensions (length x width) cir. 175 x 105 mm.

LED display

The 6-digit display of the remote control unit can be used as an additional stopwatch display or else can be used to retain the starting time. Operating voltage: bus voltage. Without any LED digital clock connected, the remote control unit can be used as a stand-alone local (desktop) stopwatch or time counter (a separate wall-plug adapter 230 VAC/12 VDC is required in this case).

Functions

- Count-up (elapsed time)/count-down (time-to-go)
- taking split time(s)
- positive and/or negative start data for the next run may be entered whilst stopwatch is counting
- Especially for media production: addition/subtraction of time intervals during ongoing count-up/count-down
- 4 memory slots for storage of data.

DCF77 radio controlled clocks

DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.) and under conditions of free radio propagation and may be impaired in heavily reinforced concrete structures. For this case we recommend a removable DCF77 aerial (option).

PEWETA DCFport24
PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

AluNox®

AluNox® is an anodised aluminium. While resistant to corrosion, detergents, and disinfectants, it is also abrasion-proof. The surface of AluNox® is visually very similar to stainless steel with a matted finish, yet is noticeably lighter and impervious against fingerprints. Therefore, AluNox® is excellently suited for areas where its visual resemblance of stainless steel will mainly serve decorative purposes.

These digital displays are champions when it comes to displaying information and results doubt-free and easy to comprehend. Optimum clearness of display combined with premium quality – a professional choice in every aspect!

LED Digital Displays, indoor for sports, business, and industry

LED digital displays
single-sided
indoor

Type series
610

52.610.161 shown

Large, very sturdy digital displays with distinct, double-row LEDs, optimum readability for all kinds of large rooms and halls, including gymnasiums.

For sports applications, these LED digital displays can also be used as stopwatches. Besides basic count-up and count-down functions a complete training program with various cycles and breaks that starts automatically when triggered can be programmed using the infrared remote control, included in delivery shipment. An additional built-in buzzer resounding at the end of count-down, cycle and break can be supplied at a surcharge (option).

Examples show time, date, temperature (option), and stopwatch modes

LED digital displays
for outdoors

see pages
178 and 179.

Case

- cir. 830x320x90 mm (cipher height 160 mm)
 - cir. 1230x400x90 mm (cipher height 250 mm)
- very sturdy aluminium case, enamelled black.
Protection grade IP 40 (EN 60529).

Resistance to thrown balls

LED digital displays of this type series are resistant to thrown balls in accordance with German standards VDE 0710, part 13:1981-05 and DIN 18032, part 3 and thus are suitable for gymnasiums and other indoor sporting facilities.

Mounting

On-wall mounting.

Front glass

Flat shock-resistant plastic glass.

LED digital display

7-segment display technology, colour red, manual brightness control in 4 steps. 4-digit display with double-row LEDs showing hours and minutes, date, and temperature (option), either permanently or alternating, intervals adjustable. Operating voltage 230 VAC/50..60 Hz.

Infrared remote control unit

All settings and the operation of the stopwatch mode are triggered by a wireless infrared remote control unit, included in delivery shipment.

Stopwatch mode

This LED digital display can also be used as a stopwatch in count-up, count-down, and training modes. The 4-digit LED display shows minute and second readings. Operation by the wireless infrared remote control unit included.

Functions possible:

- **count-up** with split times
- **count-down** with indication of initial value
- **training** with adjustable number and duration of cycles and breaks.

“resistant to thrown balls”
acc. to VDE 0710/DIN 18032

24.676.321 shown

Game result displays/scoreboards, in 7-Segment LED display technology, cipher heights 250 mm and 200 mm respectively, reading distance up to cir. 110 m. Outstandingly suited for most kinds of indoor sports, such as indoor soccer, handball, basketball, volleyball, hockey, badminton, and table tennis.

Sturdy metal case, enamelled black, for on-wall mounting, polycarbonate front glass treated for low reflectivity, resistant to thrown balls in accordance with German standards VDE 0710, part 13:1981-05 and DIN 18032, part 3.

24.676.322 shown

Game result display board with LED text display for team names

Soccer scoreboards for outdoors

see pages 180 and 181.

■ Scoreboard 24.676.321:

- **Time display** (250 mm), 4-digit, white, showing minutes and seconds of game time, time elapsed or time-to-go
- **Real time clock** (250 mm), showing current time in hours and minutes when no game is going on (instead of game time), quartz-based, optionally DCF77 radio controlled (including receiving aerial) or connected to a PEWETA Master Clock by means of a *DCFport24* interface (accessories)
- **Score** (250 mm), 3 digits (0..199) per team, red, showing score/final result
- **Period** (200 mm), 1 digit, green, showing current period of game
- **Penalty time** (200 mm), 3 digits per team, amber, showing penalty time remaining
- **Team fouls** (200 mm), 1 digit per team, amber, showing total fouls per team during basketball games (instead of penalty time)
- **Time-out**, 3 symbols per team (green dots), showing time-out periods taken
- **Service**, 1 symbol per team (red arrow), showing service or ball possession
- **Acoustic signal** (horn), built-in, indicates time-out, end of period or game over, may be triggered either automatically or manually (116 dB at 1 m)
- Permanent **HOME/GUEST** marking by self-adhesive film, available in various languages.

Scope of delivery

- **1 control panel**, multi-lingual, data transfer by radio, frequency 868..869 MHz (standard), or wire-based (set of wires is an accessory), with LCD display and keyboard. 13 kinds of sports stored. Additional, freely programmable mode or training mode
- **1 wall plug adapter** for charging the rechargeable batteries of the control panel
- **1 hand-held control unit** to send start, stop, and time-out commands and to trigger the horn, incl. 2 m wire for hook-up with the control panel (if required)
- **1 transport case** (cir. 355x255x86 mm) to safely store control panel, control unit, and plug adapter.

■ Scoreboard 24.676.322:

- exactly as Scoreboard 24.676.321, however, additionally with
- **LED text display** (120 mm), amber, alphanumeric, to indicate the teams' names (instead of "HOME", "GUEST"), up to 9 characters per team, or to display information/advertisements with up to 20 characters in moving-script-method (up to 1,000 characters programmable). PC keyboard with connection wire to the control panel is included.

Further models

of this type series with 150 mm LED cipher height for small (single field) sports halls are available on request.

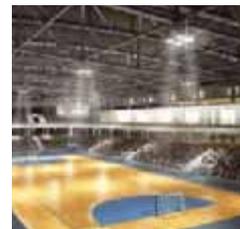

Technical data	
Data transmission	wireless 868..869 MHz (standard) or, additionally, wire-based (set of wires is an accessory)
Case dimensions (WHD)	cir. 1900x1150x90 mm
Front cover	polycarbonate treated for low reflectivity
Character heights	250 mm and 200 mm, respectively
Reading distance	cir. 110 m, view angle cir. 160°
Weight	cir. 35 kg
Operating voltage	mains 220..230 V AC/50..60 Hz

LED Game Result Displays/Scoreboards, indoor with penalty time display for handball and hockey

LED game result displays single-sided indoor

Type series
676

“resistant to thrown balls”
acc. to VDE 0710/DIN 18032

24.676.541 shown

Game result displays/scoreboards, in 7-Segment LED display technology, composed of a main scoreboard and a 3-line penalty time display. As a stand-alone-unit, the main scoreboard is suited for most kinds of indoor sports. For handball and hockey, the augmenting penalty time display can show up to 3 penalty times per team, along with a 2-digit player number.

Sturdy metal case, enamelled black, for on-wall mounting, polycarbonate front glass treated for low reflectivity, resistant to thrown balls in accordance with German standards VDE 0710, part 13:1981-05 and DIN 18032, part 3.

24.676.542 shown

Game result display board with LED text display for team names

■ Scoreboard 24.676.541:

- **Time display** (250 mm), 4-digit, white, showing minutes and seconds of game time, time elapsed or time-to-go
- **Real time clock** (250 mm), showing current time in hours and minutes when no game is going on (instead of game time), quartz-based, optionally DCF77 radio controlled (including receiving aerial) or connected to a PEWETA Master Clock by means of a DCFport24 interface (accessories)
- **Score** (250 mm), 3 digits (0..199) per team, red, showing score/final result
- **Period** (200 mm), 1 digit, green, showing current period of game
- **Team fouls** (200 mm), 1 digit per team, amber, showing total fouls per team during basketball games (instead of penalty time)
- **Time-out**, 3 symbols per team (green dots), showing time-out periods taken
- **Service**, 1 symbol per team (red arrow), showing service or ball possession
- **Penalty time** (160 mm), 3 lines with 3 penalty times per team, each composed of 2-digit player number (white) and 3-digit penalty time (red), showing penalty time counting down
- **Acoustic signal** (horn), built-in, indicates time-out, end of period or game over, may be triggered either automatically or manually (116 dB at 1 m)
- Permanent **HOME/GUEST** marking by self-adhesive film, available in various languages.

Scope of delivery

- **1 control panel**, multi-lingual, data transfer by radio, frequency 868..869 MHz (standard), or wire-based (set of wires is an accessory), with LCD display and keyboard. 13 kinds of sports stored. Additional freely programmable mode or training mode
- **1 wall plug adapter** for charging the rechargeable batteries of the control panel
- **1 hand-held control unit** to send start, stop, and time-out commands and to trigger the horn, incl. 2 m wire for hook-up with the control panel (if required)
- **1 transport case** (cir. 355x255x86 mm) to safely store control panel, control unit, and plug adapter.

Outdoor Clocks

analog and digital
single, double and four faces

Time displayed outdoors, in a modern analog clock or displayed digitally alternating with date and temperature, ideally combined with your company's logo, has always been and still is a public service information in high demand. Take advantage of this demand by using PEWETA outdoor clocks and display systems! Water protected and resistant against weather and other environmental influences.

Outdoor Clocks

thrown balls

see pages 76...79.

Case

- cir. 446 mm diameter
- cir. 546 mm diameter
- cir. 646 mm diameter

very sturdy metal case, enamelled metallic dark gun metal (DB 703) or, as an option, enamelled in metallic silver grey (RAL 9006) or custom enamelled, as listed below. Extraordinarily solid construction, absolutely corrosion resistant and weatherproof. Protection grade IP 54 (EN 60 529).

Mounting

Wall mounting.

Resistance to thrown balls

acc. to DIN 18032, part 3 (option)
Clocks of this type series are also available resistant to thrown balls and thus suitable for school yards and sporting facilities. Very sturdy case with three-point mounting as a safeguard, proof against wrenching of the hook. Front glass is a 2-layer laminated safety glass, 6 mm thick. The clocks are certified and labelled "resistant to thrown balls according to DIN 18032, part 3".

Front glass

Flat shock-resistant Plexiglas® XT (PMMA) as standard.

Face

High distinction white metal, choice of large black Arabic numerals or large black DIN bar markings. Very distinctive and easy doubt-free reading even over longer distances. Visible face diameter 420 mm, 520 mm resp. 620 mm. Faces printed according to DIN 41 091.

Hands

Pointed black DIN bar-type hands (DIN 41 092) for hour and minute. Red second hand or distinct "Railway Station Clock" style red second hand with "eye" on synchronous clocks (21.xxx), on minute/second pulse clocks (72.xxx) and on clocks with synchronous second hands (74.xxx) only.

Outdoor analog single face

Type series

730

DCF77 radio controlled clocks

DCF77 radio controlled clocks of this type series will be supplied including a remobile DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24

PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24

PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP

NTP slave clocks require an NTP time server (see page 191).

Outdoor Clocks (also suitable for large halls) single face, round, **backlighted by LED**

Outdoor
analog
single face

Type series

750

74.750.621 shown

Extraordinarily sturdy **high quality industrial grade** outdoor clocks, also suitable for indoors. Solid workmanship, **backlighted by LED**, weather protected case (IP 54/EN 60 529).

71.750.621 -48

Clocks of this type series with Arabic numerals bear the Item Number suffix **-48**.

Case

- cir. 670 mm diameter
- cir. 902 mm diameter

weatherproof aluminium case. Outside 2-layer tempered enamel, light grey (RAL 7035). Optionally custom enamelled, at a surcharge. Extraordinarily solid construction, incl. light fitting. Absolutely corrosion resistant and weatherproof. Protection grade IP 54 (EN 60529).

Mounting

On-wall mounting as standard. At a surcharge, a wall or ceiling mounting bracket or a pole adapter are available as options.

Front glass

Shock-resistant, highly transparent 4 mm Plexiglas® XT. For locations prone to impact or public areas, unbreakable Makrolon® (polycarbonate) front glass is available as an option.

Face (backlighting)

Acrylic plastic, white, translucent, 5 mm thick, large black DIN bar markings (or black Arabic numerals as an option). Very distinctive and easy doubt-free reading even over longer distances.

Face printed according to DIN 41049.

Illumination

Backlighting by durable, maintenance-free light-emitting diodes (LEDs), operating voltage 230 VAC/50...60 Hz. As an option, a light-sensitive switch can be included.

Hands

Pointed black DIN bar-type hands (DIN 41092) for hour and minute. Distinctive red "Railway Station clock" type second hand with "eye" on slave clock with synchronous second hand (74.xxx) only.

No second hand on other clock types.

These clocks are available optionally with customised features at the surcharges as listed. Just pick your option(s) and add the appropriate suffix(es) to the Item No.

DCF77 radio controlled clocks
DCF77 radio controlled clocks of this type series will be supplied including a removable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24
PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24
PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP
NTP slave clocks require an NTP time server (see page 191).

¹⁾ A removable DCF77 receiving aerial is included in delivery shipment.

²⁾ DCFport24 pulse telegram slave clocks with 800 mm face diameter require a 230 VAC power supply.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

Case with lugs for suspension by ropes or chains (indoor mounting only)	-30	on request
Light-sensitive switch for internal illumination	-44	195.-
Custom logo on clock face	-47	on request
Face with Arabic numerals instead of DIN bar markings	-48	on request
Unbreakable Makrolon® front glasses instead of Plexiglas® (for 842x842 mm clocks only)	-56	790.-

Options – just as you like them ...

These clocks are available optionally with customised features at the surcharges as listed. Just pick your option(s) and add the appropriate suffix(es) to the Item No.

DCF77 radio controlled clocks
DCF77 radio controlled clocks of this type series will be supplied including a removable DCF77 aerial (IP 68). Thus, optimum reception quality can be achieved regardless of the final placement of the clock itself. However, DCF77 radio controlled clocks will only function correctly within a radius of approx. 1,500 km around Mainflingen (50 km east of Frankfurt/M.).

PEWETA DCFport24
PEWETA DCFport24 slave clocks require a PEWETA master clock (see from page 184 on).

PEWETA AirPort24
PEWETA AirPort24 slave clocks require an AirPort24 transmitter or repeater respectively (see page 189).

NTP
NTP slave clocks require an NTP time server (see page 191).

¹⁾ A removable DCF77 receiving aerial is included in delivery shipment.

²⁾ DCFport24 pulse telegram slave clocks with 800x800 mm face dimensions require a 230 VAC power supply.

³⁾ NTP slave clocks of "PoE" type require a PoE (Power over Ethernet) power supply. Appropriate hardware has to be supplied by customer.

Training Clocks/Pace Clocks, for in- and outdoors, with seconds cross, **backlighted by LED**

Indoor/
Outdoor
analog
single face

Type series
765

LED

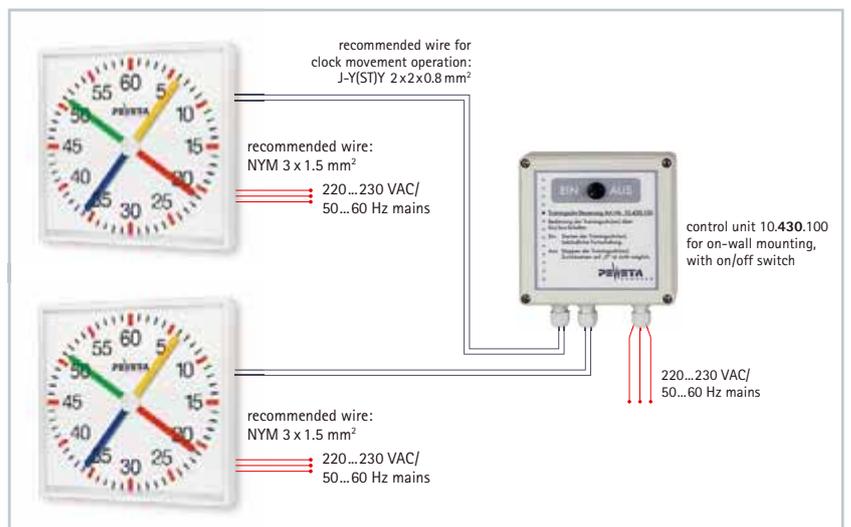

42.765.611 shown

This kind of training/pace clocks indicates split times during swim training/warm-up training. Times are taken by each swimmer individually. The 4-coloured seconds cross indicates the time elapsed, one complete turn corresponds to exactly 60 seconds.

For parallel operation of several training clocks, the slave clock type connected to the central control unit 10.430.100 is recommended. Thus an identical display (synchronous time) is always guaranteed on all training clocks connected.

Diagram shows
2 training clocks 71.765.611
with control unit 10.430.100

Case

■ cir. 642 x 642 mm weatherproof aluminium case. Outside 2-layer tempered enamel, light grey (RAL 7035). Optionally custom enamelled, at a surcharge. Extraordinarily solid construction, incl. light fitting. Absolutely corrosion resistant and weatherproof. Protection grade IP 54 (EN 60 529).

Mounting

On-wall mounting as standard. Wall or ceiling mounting bracket available at a surcharge (option).

Clock types

- Quartz movement, mains operated 230 VAC
 - Slave movement, pulse operated 24 V To be operated by control unit 10.430.100 only.
- Recommended for synchronized, parallel operation of up to 4 training clocks/pace clocks 71.765.611 in securely fixed position.**

Face (backlighted)

Acrylic plastic, white, translucent, 5 mm thick, with red/black second bars and black numerals. Very distinctive and easy doubt-free reading even over longer distances.

Illumination

Backlighting by durable, maintenance-free light-emitting diodes (LEDs), operating voltage 230 VAC/50...60 Hz. As an option, a light-sensitive switch can be included.

Hands

Acrylic plastic 4-coloured cross, translucent, intervals in second cycles.

Front glass

Shock-resistant, highly transparent 4 mm Plexiglas® XT.

Function

The (swim) training/pace clock can be used by any number of swimmers simultaneously.

The crossed second hands show the time elapsed in seconds.

The swimmer will wait for a maximum of 14 seconds until the next colour of the four second hands ("his" colour) reaches the 12-o'clock-position and will then memorise the colour of "his" hand.

Upon reaching the edge of the pool (after 1 or 2 laps) the time elapsed can be read according to the position of "his" second hand.

Outdoor Clocks (also suitable for large halls)

four faces, backlighted

Outdoor
analog
four faces

Type series

790

71.790.626 shown
with pole adapter 01.790.001

Extraordinarily sturdy **high quality industrial grade** outdoor clocks. Also suitable for indoors, e. g. for large halls. Solid workmanship, backlighted, weather protected case (IP54/EN 60529).

We provide a ready-to-install product which can be mounted and connected without problem. The clock contains finished electrical wiring as well as mechanical fixing points for mounting. On request, we will be happy to support you with additional mounting instructions and other information.

Different face and hand variations are possible (option).

**Clock cubes
for indoor use**

see pages 96...99.

Case

- cir. 780 x 780 x 780 mm weight cir. 80 kg
- cir. 980 x 980 x 980 mm weight cir. 100 kg

Weatherproof metal case, four faces, including light fitting. Frame of extruded hollow aluminium mouldings, neatly mitred at all corners. Clock faces are attached to frame with hidden stainless steel hinges and inspection latches for maintenance access. Interior of case permanently ventilated to avoid condensation. Outside surface anodised in silver (E6/EV1) as standard, or, at a surcharge, custom enamelled (option).

Mounting

As standard, no mounting fixtures are included in delivery shipment. Optional mounting accessories:

- A reinforced floor plate for mounting on solid ground
- A pole adapter (length cir. 300 mm, fits on an existing pole).

The clock case is designed for wind loads of up to cir. 0.5 KN/m² (standard value). Actual wind loads depend on the individual location and have to be accounted for locally. This considered, a sufficiently firm footing is to be made sure.

Front glasses

Single-pane safety glass (according to German safety standard ESG), embedded in permanently elastic, weatherproof special gaskets.

Faces (backlighted)

Acrylic plastic, translucent, white, 5 mm, large DIN black bar markings. Very distinctive and easy doubt-free reading even over longer distances. Other face and hand variations are available on request (options). Faces printed according to DIN 41 049.

Illumination

Fluorescent tubes for 230 VAC/50...60 Hz are installed and wired as standard. As an option, LED tubes can be included instead of fluorescent tubes.

Hands

Pointed black DIN bar-type hands (DIN 41 902) for hour and minute. Distinctive red "Railway Station clock" type second hands with "eye" on slave clock with synchronous second hands (74.xxx) only.

LED Digital Displays, outdoor

showing the time, alternating with date and temperature

Digital displays
single-sided
outdoor

Type series

810

Large, very sturdy digital displays with distinct, double-row LEDs, optimum readability, even at longer distances.

For sports applications, these LED digital displays can also be used as stopwatches. Besides basic count-up and count-down functions a complete training program with various cycles and breaks that starts automatically when triggered can be programmed using the infrared remote control, included in delivery shipment.

52.810.251 shown

Examples show time, date, temperature, and stopwatch modes

LED digital displays
for indoors

see pages
152 and 153.

Case

- cir. 830x320x90 mm (cipher height 160 mm)
 - cir. 1230x400x90 mm (cipher height 250 mm)
- very sturdy aluminium case, enamelled black.
Protection grade IP 54 (EN 60529).

Resistance to thrown balls

LED digital displays of this type series are resistant to thrown balls in accordance with German standards VDE 0710, part 13:1981-05 and DIN 18032, part 3 and thus are suitable for school yards and sporting facilities.

Mounting

On-wall mounting by means of 4 angular metal brackets (included in delivery shipment).

Front glass

Flat shock-resistant plastic glass.

LED digital display

7-segment display technology, colour red, automatic brightness control. 4-digit display with double-row LEDs showing hours and minutes, date, and temperature, either permanently or alternating, intervals adjustable.

Operating voltage 230 VAC/50..60 Hz.

Infrared remote control unit

All settings and the operation of the stopwatch mode are triggered by a wireless infrared remote control unit, included in delivery shipment.

Stopwatch mode

This LED digital display can also be used as a stopwatch in count-up, count-down, and training modes. The 4-digit LED display shows minute and second readings. Operation by the wireless infrared remote control unit included.

Functions possible:

- **count-up** with split times
- **count-down** with indication of initial value
- **training** with adjustable number and duration of cycles and breaks.

Further models

of this type series with different cipher heights and/or with a 6-digit display (hh:mm:ss) are available on request.

LED Soccer Score Display Board, outdoor showing game time and time respectively

Digital displays
single-sided
outdoor

Type series

830

24.830.422 shown

7-segment LED technology score display board, cipher height 460 mm, reading distance up to cir. 180 m. Suitable for soccer, rugby, and lawn hockey.

Case

■ cir. 2500x1800x90 mm consisting of 2 modules. Very sturdy aluminium cases, enamelled black. Protection grade IP 54 (EN 60529).

Resistance to thrown balls

The soccer score display board of this type series is resistant to thrown balls in accordance with German standards VDE 0710, part 13:1981-05 and DIN 18032, part 3 and thus are suitable for outdoor sporting facilities.

Mounting

On-wall mounting by means of 4 angular metal brackets (included in delivery shipment). Rear-side mounting bracket for attachment to an I-beam or pole pipe available on request.

Front glass

Flat shock-resistant plastic glass.

HOME/GUEST marking

Permanent marking by self-adhesive film, available in various languages.

Score display

One 2-digit display per team, 7-segment triple-row LED technology, cipher colour red, cipher height 460 mm. Manual brightness control in 9 steps triggered by the control panel.

Game time display

4-digit display with 7-segment triple-row LED technology, cipher colour red, cipher height 460 mm, showing game time in minutes and seconds during a game. Real time display showing hours and minutes when no game is going on possible. Quartz technology (DCF77 receiving aerial or time display interface to import the DCFport24 pulse telegram from a PEWETA master clock available as accessories).

Scope of delivery

- **1 control panel**, multi-lingual, transfer by radio, frequency 868 .. 869 MHz (standard), or wire-based (option), with LCD display and keyboard. Programs for soccer, rugby, and lawn hockey stored
- **1 wall plug adapter** for charging the rechargeable batteries of the control panel
- **1 transport case** (cir. 355x255x86 mm) to safely store control panel and plug adapter.

Further models

of this type series with 250 mm LED cipher height for small sports facilities or with LED text display for team names or messages in moving-script-method available on request.

Control Units

- Master Clocks/Signalling Master Clocks
- DCF77/GPS Receiving Aerials
- Booster for Master Clocks
- *AirPort24* Transmitter and Repeater
- NTP Time Server
- 19" Modular Master Clock System

Clock systems, as compared to stand-alone clocks, have one main advantage: all connected slave clocks display *identical* time. The "source of time" for this time display service always is the Master Clock.

Master Clock/ Signalling Master Clock

Using an internal quartz time base, the maximum error is cir. ± 0.5 sec. per day. If a radio receiver (DCF77 or GPS) is connected, the Master Clock will evaluate the time-and-date signals received, check for and correct any possible discrepancies and then transmit the updated time information as pulses (minute-, half minute- or second-pulses) or as a telegram (e.g. PEWETA *DCFport24* pulse telegram by wire, *AirPort24* wireless pulse telegram) to all connected slave clocks. Summer/winter time change-over is performed automatically. If the Master Clock is required, in addition to transmitting the time-and-date information, to effect switching operations, such as activation of optical and/or acoustic signalling

devices to indicate start of work or break periods, in industry or at schools, master clocks can be equipped with additional signal (switching) outputs. These output terminals are free-floating and capable of controlling also other external equipment, such as lighting, air conditioning, ventilation, heating or security alarm systems as well as many others.

Conventional pulse

Conventional slave clocks are advanced by alternating polarity pulses (minute-pulse or second-pulse) one time unit at a time. 4-core wire is recommended for the slave clock control line(s), recommended type is J-Y(ST)Y 2x2x0,8 mm², but existing 2-wire lines may continue in use.

DCFport24 pulse telegram

PEWETA slave clocks with *DCFport24* input are controlled by a wire-transmitted DCF77 pulse (time and date) telegram. Their advantages over conventional slave clocks are:

- extremely easy "plug-and-play" installation
- no need to watch for control line polarity
- quick initiation by automatic, extremely rapid self-adjustment to current time,

regardless of position of hands on analog clocks at delivery

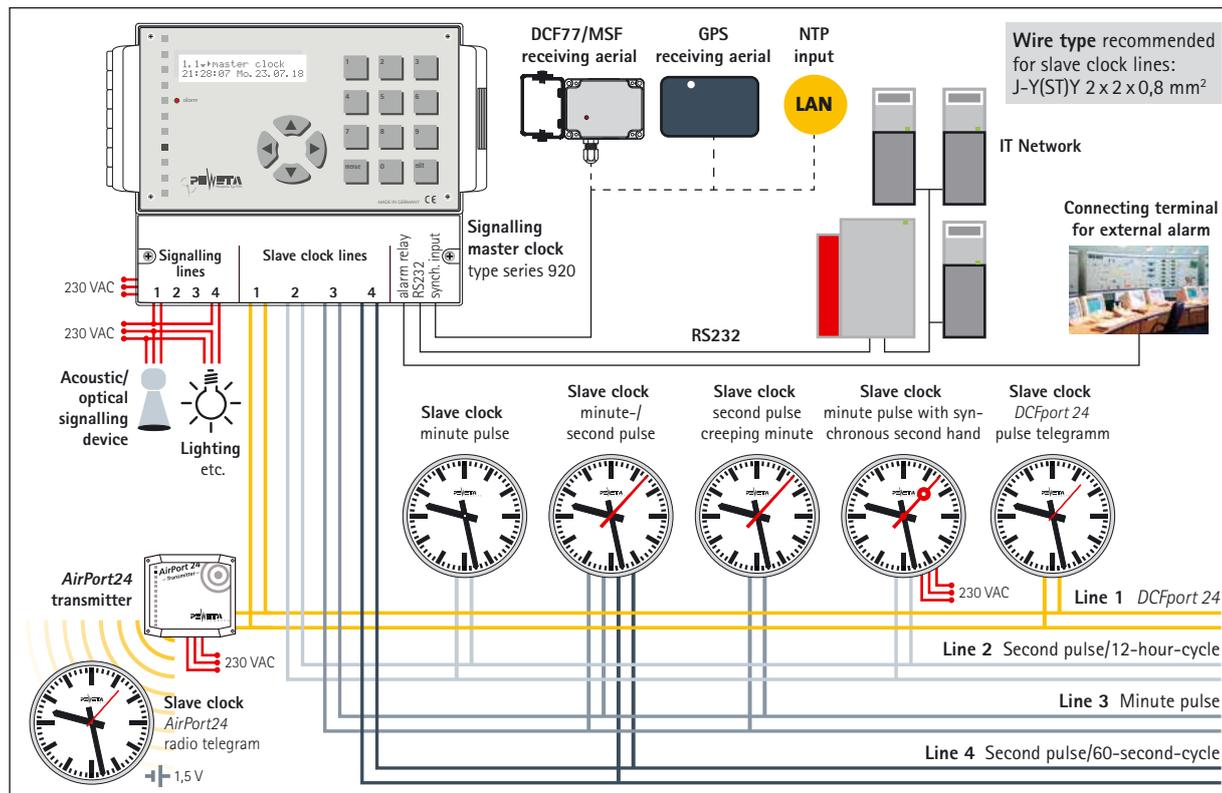

- Central second hand(s) available as standard for clock faces up to 400 mm diameter.
- When changing over from conventional pulse control to the PEWETA *DCFport24* pulse telegram, existing 2-wire lines or networks may continue in use. For new installations, use of 4-core wire type J-Y(ST)Y 2x2x0,8 mm² is recommended.
- There is a possibility to use existing conventional slave clocks simultaneously with new PEWETA *DCFport24* pulse telegram slave clocks. To make use of this possibility, a PEWETA Master Clock series 920 with 2 slave clock lines is required as a minimum. Type of pulse and/or telegram may be assigned to each slave clock line individually.

AirPort24 radio telegram (RF)

The PEWETA *AirPort24* system enables a wireless transmission of time and date information to all *AirPort24* slave clocks (868..869 MHz frequency band). For more information see pages 7 and 189 or give us a call.

Wiring Diagram

for PEWETA type series 920 Master Clock

Wiring diagram
for type series
920 Master
Clock

Slave clocks may be operated by a PEWETA type series 920 Master Clock under the following pulse formats:

Minute Pulse, 12...60 V

The polarity alternating pulse is distributed by a two-wire line. In analog clocks, the minute pulse also is the power supply. Before initiation, all slave clocks must be manually pre-set to indicate the starting time. All clocks must be connected in the same polarity.

Minute and Second Pulse, 12/24 V

To control slave clocks with minute/second pulse movements, a Master Clock with a minimum of 2 slave clock lines is required. In addition to the minute pulse (see above), a polarity alternating second pulse is transmitted on a separate (!) 2-wire line. In analog clocks, the minute and second pulse also is the power supply. Before initiation, all slave clocks must be manually pre-set to indicate the starting time. All clocks must be connected in the same polarity.

Minute Pulse 12/24 V, Synchronous Second, 230 VAC/50...60 Hz

Same function as minute pulse 12...60 V, however, the creeping second hand is powered by 230 VAC/50...60 Hz mains and is synchronised to the polarity alternating minute pulse at every full minute.

Second Pulse 12/24 V with Creeping Minute

To control slave clocks with a second pulse only movement a second pulse with a 12-hour cycle is required. The polarity alternating second pulse is transmitted by a 2-wire line, the creeping minute hand is "pulled along". In analog clocks, the second pulse also is the power supply. Before initiation, all slave clocks must be manually pre-set to indicate the starting time. All clocks must be connected in the same polarity.

DCFport24 Pulse Telegram

An interference-protected DCF77 pulse telegram (12/24 V) is transmitted by a 2-wire line. All clocks connected to the system will automatically adjust to current time (plug-and-play), independent of polarity and position of hands in analog clocks. No manual pre-setting of time is required. For analog clocks and LCD digital clocks, this also provides the operating power. Analog clocks with faces up to 400 mm diameter always come equipped with a second hand.

The DCFport24 is also capable of providing power for a limited number of LED digital clocks, otherwise, 230 VAC/50...60 Hz (for other voltages, please call us) mains power is required.

For further information about the DCFport24 pulse telegram see page 6.

AirPort24 Radio Telegram

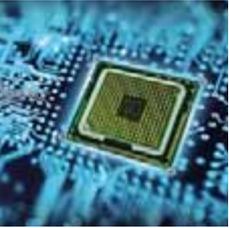

To control slave clocks by AirPort24 radio telegram, at least 1 AirPort24 transmitter, and if conditions dictate, 1 AirPort24 repeater are required. A wire network, as in conventional slave clock systems, is not required, complete time and date information is distributed interference-proof by RF transmission (in the 868...869 MHz UHF band) throughout a radius of cir. 250 m to all slave clocks located in this reception area. All clocks self-adjust immediately and fully automatically (plug-and-play) to current time. Analog clocks may operate either on 1.5 V battery power or 230 VAC/50...60 Hz mains, LED digital clocks always need 230 VAC/50...60 Hz (other voltages/cycles on request) mains power. Analog clocks with faces up to 400 mm diameter always come equipped with a second hand.

For further information about the AirPort24 radio telegram see page 7.

Different clock drive modes may be used in parallel if the controlling PEWETA Master Clock is equipped with a sufficient number (2 minimum) of slave clock lines.

Typical performance data

Control of slave clocks

- **1, 2 or 4 slave clock lines**
- **Pulse Mode 12/24 V**, may be selected for each line as
 - alternating polarity minute pulse
 - alternating polarity half-minute pulse
 - alternating polarity second pulse
 - *DCFport24* pulse telegram
 - *AirPort24* radio telegram (in combination with an *AirPort24* transmitter)
- **Pulse duration** is adjustable from .2 sec to 9.9 sec.
- **Total output power** is 1 A at 24 V (2 A at 12 V) line voltage to control up to
 - 160 conventional slave clocks (at 6 mA/24 V each) or up to
 - 40 PEWETA *DCFport24* pulse telegram slave clocks (12 V). With a pulse amplifier (Item Number 10.930.124), the system may be expanded by up to 125 PEWETA *DCFport24* pulse telegram slave clocks
 - an unlimited number of *AirPort24* radio telegram slave clocks (in combination with a PEWETA *AirPort24* transmitter (Item Number 10.940.100) and a PEWETA *AirPort24* repeater (Item Number 10.941.100) respectively

- **Simultaneous operation** of conventional slave clocks and *DCFport24* pulse telegram slave clocks is possible (2 slave clock lines minimum)
- Optional **power outage reserve**, selectable for individual slave clock lines. A rechargeable NiCd battery, 24 V/6 Ah for 24 V lines or 12 V/1.2 Ah for 12 V lines, provides for continued operation of all connected clocks in case of a mains power outage
- Electronic **memory** and automatic update function will, upon return of mains power (e. g. after a mains outage) immediately readjust all connected clocks to current time
- **Slave clock lines with voltage and current surveillance**. Mains power outage, overload (or low voltage when operating in memory mode) in the clock control line will cause an alarm by red LED and alarm flag in the display. A free-floating switch contact is available to trigger an external alarm device.
- **Slave clocks will automatically be stopped when low voltage is detected**
- **Secondary Master Clocks** for expanding the clock system may be synchronised by the *DCFport24* output
- For the **control of world time displays** 26 pre-programmed zone times and one freely configurable zone time may be, at customer's choice, assigned as system (local) time or to any slave clock line

- **1 RS232 serial interface** (output) is available for continuous transmission of time-and-date information in ASCII format.

Signalling device

- 0, 2 or 4 programmable signal contacts (switch points/free-floating contacts) capable of 250 VAC/2 A
- Choice of program run for a day, a week or a year
- Up to 600 switch actions programmable
- ON/OFF switching or pulse action
- Fastest possible switching sequence: 1 second
- Reprogrammable every day, week or year, block-building is possible
- Fixed-program calendar through 2099
- Data retention on power outage > 5 years.

Additional performance data

- Input terminal for radio control by DCF77, GPS, MSF or similar is available as an option
- NTP input terminal (RJ45) for synchronisation by LAN (option)
- Alphanumeric LCD display for user-friendly dialog-type navigation, time-and-date readout and alarm indications
- Multilingual navigation, 7 languages selectable: English, French, Spanish, Portuguese, German, Italian and Dutch
- Keyboard locked, accessible by PIN-code only.

Booster Amplifier

Wall or top hat bar mounting, or 19" rack mounting

Booster amplifier

When a Master Clock reaches its limits of total power output, pulse boosting amplifiers are needed for further extension of the master/slave clock system.

The short-circuit-proof slave clock line output terminals can be freely configured as

- alternating polarity minute pulse
- alternating polarity second pulse
- *DCFport24* pulse telegram.

Electronic buffer memory and automatic updating circuitry cover power outages and ensure return to correct time if power returns within 24 hours.

Item No. 10.930.124

1 slave clock line input/output terminal 12/24 V, total output power 1.5 A at either 12 V or 24 V, capable of controlling up to

- 250 conventional slave clocks (at 6 mA/24 V)
- or
- 125 *DCFport24* pulse telegram slave clocks (á 12 mA/24 V).

Plastic case (IP 20/EN 60529) for wall mounting or mounting on a 35 mm top hat bar. Operating voltage 230 VAC/50...60 Hz, (external power supply for mounting on a 35 mm top hat bar, included in delivery shipment).

Item No. 11.930.224

2 slave clock lines input/output terminals 12 V or 24 V, total output power 3 A (1.5 A per line), capable of controlling up to

- 500 (max. 250 per line) conventional slave clocks (at 6 mA/24 V)
- or
- 250 (max. 125 per line) *DCFport24* pulse telegram slave clocks (at 12 mA/24 V).

Metal case (IP 10/EN 60529) for mounting in 19" sub-rack, dimensions (WxHxD) 213 mm (42 WU) x 128 mm (3 HU) x 230 mm. Operating voltage 230 VAC/50...60 Hz.

PEWETA AirPort24 Transmitter and Repeater

Time distribution by RF transmission (868 ... 869 MHz)

As an alternative to wire-bound clock systems or to individual clocks with DCF77 aerials, the PEWETA AirPort24 radio telegram technology permits the distribution of a time signal by radio inside or outside of buildings.

The PEWETA AirPort24 transmitter receives the time and date telegram either by wire from a PEWETA type series 920 Master Clock (see pages 184...187), by radio from a DCF77 receiving aerial or as an NTP client by LAN and transmits the complete time/date information by radio (in the 868...869 MHz UHF-band) with a range of about 250 m inside buildings (up to cir. 1,000 m outdoors). All PEWETA AirPort24 radio telegram slave clocks within this range will automatically self-adjust to the current time and date indication.

Using PEWETA AirPort24 repeaters extends the range by a further 250 m per repeater.

PEWETA AirPort24 transmitter

Transmitter with integrated aerial for distributing the PEWETA AirPort24 time/date telegram to all radio telegram slave clocks within a radius of cir. 250 m inside buildings (up to cir. 1,000 m outdoors).

Choice of input signal:

- **PEWETA DCFport24 pulse telegram** for synchronization by a PEWETA type series 920 Master Clock
- **DCF77** for synchronization by a detached DCF77 receiving aerial
- **NTP** for synchronization by LAN (NTP client).

PEWETA Airport24 repeater

Receives the PEWETA AirPort24 time/date telegram from the PEWETA AirPort24 transmitter and transmits the PEWETA AirPort24 time/date telegram to radio telegram slave clocks within a radius of cir. 250 m inside buildings (up to cir. 1,000 m outdoors).

10.940.100 shown

Technical data for transmitter and repeater

Input: NTP synchronization by LAN (NTP client)	10.940.200	869.-
PEWETA AirPort24 repeater	Item No.	€ each
Input: PEWETA AirPort24 radio telegram	10.941.100	679.-

Characteristics

- Transmission of the complete time/date telegram
- Reliable transmission of time/date telegram within a range of 250 m inside buildings, more than 1,000 m outdoors
- Unlimited number of AirPort24 telegram slave clocks within this range
- Cost-effective and simple wireless installation
- Capable of unlimited expansion by using repeaters
- Location of clocks at random, indoors or outdoors within transmission range
- Also suitable to expand existing, wire supported slave clock networks.

Slave Clock Control Unit

minute pulse 24 V output

Slave clock control unit

This slave clock control unit, governed by DCF77, is capable of controlling up to four indoor/outdoor slave clock movements (at 6 mA/24 V each). Specifically suited to operate in- or outdoor clocks (e.g. with advertising) and all other single, double, or 4-faced slave clocks.

By means of a DCF77 aerial the control unit receives the exact time including the trigger signal for the automatic change-over between summer and winter time. In case of impaired reception due to local conditions pulse transmission to the slave clocks connected will be kept up. After a power outage the slave clocks connected will automatically be adjusted to match the correct time. After installation the control unit operates completely autonomous and maintenance-free.

- Alternating polarity minute pulse, 24 V
- Total output power cir. 30 mA/24 V
- Output is tolerant of circuit shorting and overload
- Electronic buffer memory and update circuitry
- Fully automatic read-in of current time upon installation or after power outage, automatic change-over between summer and winter time
- Operating voltage 230 VAC/50...60 Hz, power consumption cir. 2 VA
- Weatherproof (IP 65/EN 60 529) plastic case for wall mounting indoors/outdoors or mounting on a 35 mm top hat bar. Dimensions (WxHxD) cir. 120x80x55 mm
- External DCF77 receiving aerial (IP 68/EN 60 529) with stainless steel mounting bracket included. Connecting wire (LIYCY 4x0,25 mm²), 5 m included in delivery shipment, may be extended to a maximum length of 50 m.

NTP Time Server

Network time distribution

The PEWETA NTP Time Server supplies the current time and date signal, received from the German DCF77 time protocol radio transmitter or from GPS satellite, to an IT network.

This enables all "clients" within the network, like for instance PCs, servers, smart phones, telephone systems, printers, and even clocks, to synchronize with this time base. A temperature controlled crystal oscillator (TXCO) ensures accurate timekeeping even in cases of a missing DCF77 or GPS radio signal. Maximum deviation during autonomous operation is +/- 16 seconds per year (standard version). Optionally, the NTP Time Server can be equipped with a crystal oven (OCXO), which reduces the maximum deviation during autonomous operation down to +/- 1.6 (!) seconds per year.

For security of operation, two time servers can be used to safeguard availability on the network (system redundancy). A web-based user interface provides for simple configuration of status messages, network settings, and safety adjustments. The support for a multitude of interfaces and formats offers maximum compatibility to common networks. The server, operating under a LINUX-based operating system, ensures maintenance-free long-term usage and can be updated if necessary. On the NTP Time Server PRO version, various common ASCII time codes can be selected for output through one of the 2 serial RS232 interfaces. Individual codes can be supplied on request.

If at least three NTP Time Servers are clustered (system redundancy) they act with a shared IP address on the network. If one of the NTP Time Servers provides a deviating time signal, this device will be deactivated and its function will be taken over by the other NTP Time Servers. Clustering functionality is included in each PEWETA NTP Time Server version as standard.

19" Modular Master Clock System

Modular Master Clock System

Type series
980

The microprocessor-controlled Master Clock System is composed of modules and may be freely configured to meet any and all individual customer demands (choice of type and number of modules according to requirement). All functional units (henceforth called modules) are packaged as plug-in cassettes to fit 19" racks in free-standing or wall-mounted cabinets, already owned by the customer or to be separately ordered from us. The integrated system bus takes care of interconnecting and addressing the individual modules. Additional interfaces facilitate data exchange with all established networks.

Principle of Function

The virtual heart of the Master Clock System is the time base module, marked **1** in the schematic, from which all control of the Master Clock System emanates. To safeguard the security of operation, as a rule two time base modules (system redundancy) are used. In case of a power disruption, programmed configurations will be retained in a flash memory. The system is synchronised by the radio receiver module **2**, connected to a choice of DCF77, GPS or RDS remote antenna.

Operation of slave clocks is facilitated by a separate line module **10** for every clock line, with a variety of choices of pulse patterns and line monitoring capabilities. An additional monitoring device **9**, measuring and indicating grounding resistance, line voltage and current on each line, is optional. Incoming error messages may be relayed through the earth-free contact **15** or monitored on a locally provided operator PC **14**.

For actuation of optical or acoustic signals (to indicate start/end of work and/or break periods) up to 8 switching modules **4** may be integrated, with 8 earth-free contacts each. Power is supplied to the Master Clock System by an internal mains adapter **11**. A rechargeable battery **12** provides power in case of a mains disruption (emergency power). Alternatively, power may be provided from an external source **13**.

Programming and control of the Master Clock System are effected either at the time base module or directly at the individual modules.

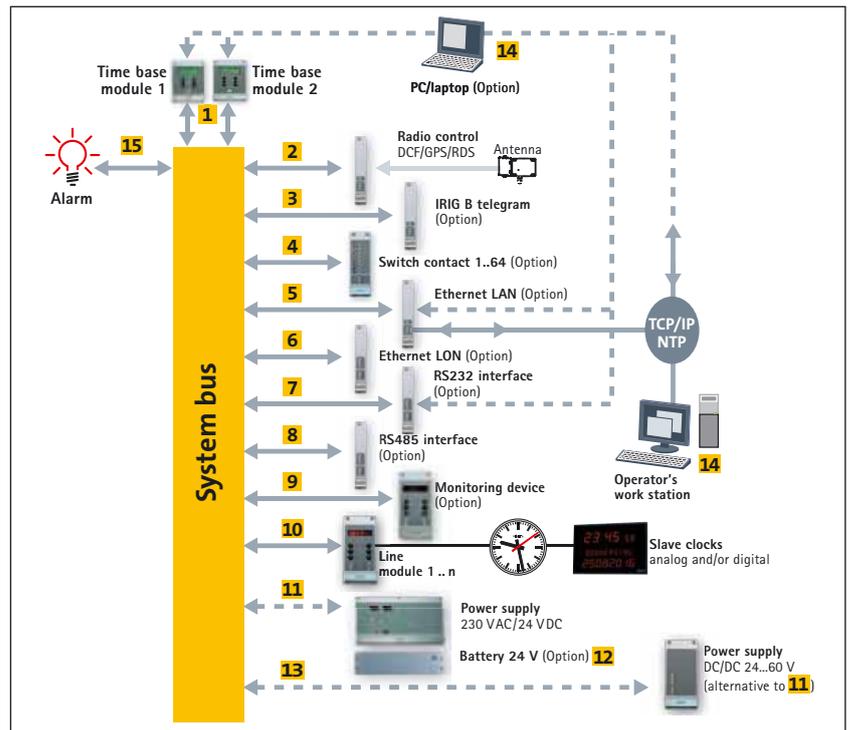

Example shown: 19" 15 HU wall-mounted cabinet with modules and blanking plates

Software and interface hardware for control from a locally installed PC **14**, connected either serially by modem **7**, or by LAN **5**, are available as options. Existing IT systems may be integrated either by LAN **5** or by serial interfaces **7**, **8**.

The Master Clock System will be completely wired and mounted in a wall-mounted or free-standing cabinet at our factory. Modules will be arranged to customer's specification.

Make your choice of desired component groups and modules on this and the following pages or call us – we will be pleased to offer you an equipment set that meets your specific demands!

Free-Standing Cabinet 38 HU

Free-standing cabinet 38 HU interior height, with provisions for mounting of 19", 3 HU racks. Feet adjustable for height, lockable clear front door. All wiring connections accessible through rear wall,

secured by a lockable metal door. Side panels are detachable with inside locks. Dimensions (WxHxD) cir. 600x1.800x650 mm, weight empty cir. 75 kg.

Type	Capacity	Item No.	€ each
19" free-standing cabinet, 38 HU (without content)	36 HU, 84 WU	11.980.138	4.990.-

Modular Master Clock System

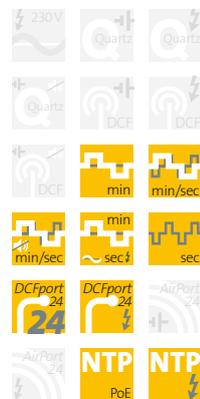

Wall-Mounted Cabinet, 12 HU, 15 HU

Wall mounted cabinet for 19" racks (3 HU each), interior height 12 HU or 15 HU. Lockable clear front door. The mounting frame is hinged to swing out and make all wiring connections accessible from behind.

Dimensions (WxHxD) 12 HU: cir. 600x612x515 mm, 15 HU: cir. 600x746x515 mm, weight empty cir. 16 kg and 18 kg resp.

Type	Capacity	Item No.	€ each
19" wall-mounted cabinet, 12 HU (without content)	12 HU, 84 WU	11.980.112	2.390.-
19" wall-mounted cabinet, 15 HU (without content)	15 HU, 84 WU	11.980.115	2.590.-

Type series 980

19" Rack Element (component group carrier) with integrated system bus

19" rack element (3 HU) for plug-in mounting of the required component groups. All individual modules are interconnected by the integrated system bus, each module's address being defined by its mounting position.

The external connections of the individual modules are located at their rear faces. Mounting different types of modules on the same rack element is permissible. Unoccupied spaces must be covered by blanking plates.

Type	Capacity	Item No.	€ each
19" rack element, 3 HU, incl. system bus (without content)	3 HU, 84 WU	11.980.184	825.-
Blanking plate, 84 WU	3 HU, 84 WU	01.980.184	125.-
Blanking plate, 12 WU	3 HU, 12 WU	01.980.112	59.-
Blanking plate, 4 WU	3 HU, 4 WU	01.980.104	39.-

Time Base Module

The microprocessor-controlled time base module is used to set the operating parameters for the entire Master Clock System, it takes central control and monitors all system functions. Once programmed, the configuration will be saved in a flash memory in case of power disruptions. Change between summer to winter time is automatic by radio control through DCF77, GPS or RDS and the respective remote antennas and/or receivers. Programming is effected by six buttons on the front panel or - optionally - by a locally installed PC or by modem from a

network. Data interfaces and programming software for all established operating systems may be ordered as extras. Error warnings in case of malfunction or power disruption are signalled by the alarm output contact or the operator's PC. The two-line, 16 digit LCD display in the front plate indicates current (system) time and date and (multiple language) messages for operator guidance. LEDs indicate current status. To enhance the security of operation, as a rule two time base modules (redundant system) are used in parallel.

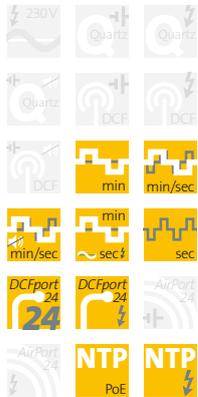

Type	Dimensions	Item No.	€ each
Time base module	3 HU, 20 WU	11.980.211	2.050.-

Make your choice of desired component groups and modules on this and the following pages or call us - we will be pleased to offer you an equipment set that meets your specific demands!

**Modular
Master Clock
System**

Type series
980

Receiver Module with Antenna

Capable of synchronising one or more time base modules, the receiver modules come complete with appropriate (DCF77, GPS or RDS) remotable antennas. Antennas may be mounted indoors or outdoors (GPS

outdoors only). LED indicator for quality of reception. Mounting device for antenna and 10 m connecting wire included (extension to several times this length possible, please call for information).

Type	Dimensions	Item No.	€ each
Receiver module DCF77, incl. antenna (IP55)	3 HU, 4 WU	11.980.221	980.–
Receiver module GPS, incl. antenna (IP65)	3 HU, 4 WU	11.980.231	1,680.–
Receiver module RDS, incl. antenna (IP65)	3 HU, 4 WU	11.980.241	1,080.–

Line Driver Module

Controlled by the superimposed time base module, the line driver modules administer switched power to the slave clock lines connected to them. The line voltage is either 24 V or 60 V (48 V on request) the line/pulse current is 1 A per module max., protected by an electronic fuse. The pulse mode may be chosen as:

- minute pulse, polarity alternating
- half-minute pulse, polarity alternating
- second pulse, polarity alternating
- PEWETA DCFport24 pulse telegram (24 V version only).

Module circuitry includes automatic recognition of too high and/or too low line

voltage with automatic safety cut-off, at the cut-off or alarm threshold of your choice. In case of a malfunction of the time base module, the line driver modules automatically without delay take over control of their slave clock lines. The line driver modules may be programmed either through the time base module or by six buttons on their front plates. The slave clock line may be visually monitored by means of a 6-digit software monitor slave clock, the LED display of which is also used for operator guidance during programming. LEDs on the front panel enable instantaneous status recognition..

Type	Dimensions	Item No.	€ each
Line driver module, 1 A, line voltage 24 V	3 HU, 12 WU	11.980.324	890.–
Line driver module, 1 A, line voltage 60 V	3 HU, 12 WU	11.980.360	990.–

Monitoring Device

For extra security of operation, the monitoring device monitors grounding resistance, line voltage and line current of the connected line modules. Voltage and current of each line may be visually checked

by means of the 6-digit digital LED display. If a line is grounded, an alarm will be triggered. LEDs on the front panel enable instantaneous status recognition.

Type	Dimensions	Item No.	€ each
Monitoring device	3 HU, 12 WU	11.980.390	1,890.–

Switching Module

The switching module offers 8 earth-free contacts for triggering optical and/or acoustic signals or alarms as well as on/off control of other systems (such as lighting or illumination). 4 of the 8 relay contact outputs are rigged for alternate function switching, the other four are for on/off switching only. On/off interval switching is programmable with intervals of 1 ... 59

seconds. A three-position switch with indicating LED per channel enables manual override of the automatic function to permanently on or off. Current capacity per contact is 6 A at 230 VAC. Up to 8 switching modules (8x8= 64 channels or circuits) may be operated in one Master Clock System. LEDs on the front panel enable instantaneous status recognition.

Type	Dimensions	Item No.	€ each
Switching module, 8 free-floating switch contacts	3 HU, 8 WU	11.980.481	1,100.–

Make your choice of desired component groups and modules on this and the following pages or call us – we will be pleased to offer you an equipment set that meets your specific demands!

Mains Power Supply Module

Power for the entire Master Clock System is supplied by the mains power supply. Input voltage is 230 VAC +/- 10 %. Output voltage is 24 VDC (rated voltage). Three output current capabilities are available: 5 A, 10 A and 20 A sustained load. The power supply is protected against short

circuits and overloads. 2 LED digital displays indicate input and output voltage and current. Alarm threshold for low input voltage cut-off may be programmed. LEDs on the front panel enable instantaneous status recognition.

Type	Dimensions	Item No.	€ each
Mains power supply module 230 VAC/24 VDC – 5 A	3 HU, 48 WU	11.980.605	1,490.–
Mains power supply module 230 VAC/24 VDC – 10 A	3 HU, 48 WU	11.980.610	2,090.–
Mains power supply module 230 VAC/24 VDC – 20 A	3 HU, 48 WU	11.980.620	3,490.–

Battery Module

Lead-acid rechargeable batteries with immobilised electrolyte are used to supply power to the Master Clock System and the slave clock lines (duration determined by number of slave clocks connected). The batteries are protected against excessive

input current by automatic circuit breakers. Two battery capacities are available: 20 Ah or 65 Ah. Maintenance-free Dryfit rechargeable batteries come complete with 19" rack element.

Type	Dimensions	Item No.	€ each
Battery module 24 V/20 Ah	3 HU, 84 WU	11.980.720	2,090.–
Battery module 24 V/65 Ah	6 HU, 84 WU	11.980.765	3,990.–

DC/DC Converter Module

If power to the Master Clock System is supplied from an external DC source, the 8 VDC converter module is needed to supply the individual modules. Input and output voltages are completely insulated against each other. Input is protected

against wrong polarity and momentary power loss. Outputs are short-circuit-proof. The number of converter modules required is determined by the number of modules to be supplied.

Type	Dimensions	Item No.	€ each
DC/DC converter module 24 V/8 V/2 A	3 HU, 12 WU	11.980.824	750.–
DC/DC converter module 60 V/8 V/2 A	3 HU, 12 WU	11.980.860	750.–

Data Interface Modules, Software

The Master Clock System may be expanded by integrating additional data interfaces. RS232 and RS485 interface modules are available to communicate with PCs/EDP- and communications networks as well as Ethernet interfaces to match the Master Clock System up with Ethernet LANs and interfaces with LON Works networks. Thus other peripheral equipment connected to the LAN will receive accurate time through the NTP protocol.

A variety of software for programming the Master Clock System is available:

- PC time software to use UTC time on the PC
- Operator software for programming various time bases
- Signalling software for the programming of switching module outputs
- Alarm software to program alarm levels and outputs to relay the alarm.

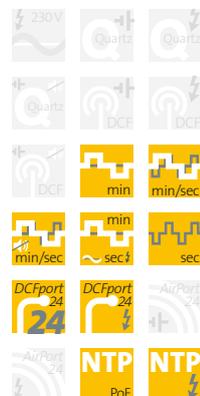

Type	Dimensions	Item No.	€ each
Data interface module RS232	3 HU, 4 WU	04.980.911	740.–
Data interface module RS485	3 HU, 4 WU	04.980.912	895.–
Data interface module Ethernet	3 HU, 4 WU	04.980.915	1,790.–
PC time software		05.980.931	650.–
Operator software		05.980.932	1,150.–
Signalling software		05.980.933	1,250.–
Alarm software		05.980.934	1,190.–

460 mm	LED	200 m	160..180 m

¹⁾ Reading distances are distances between the clock and an observer, derived from practical experiments. For analog clocks, black DIN bar markings and black bar-type hands on white clock faces (in accordance with DIN 41 091) were used.

All distances are given as aids to orientation only and are without obligation.

IP Protection Grades

acc. to EN 60 529

The grade of protection indicates the suitability of electrical components for various environmental conditions. Different grades of suitability are classified into so-called **IP codes**. IP stands for International Protection.

The IP protection grades define the grade of protection that the case provides against contact, foreign solid objects, and water.

The protection rating is always indicated by the letters IP followed by two digits. The **first digit** indicates the degree of protection that the case provides against contact and solid foreign objects. The **second digit** indicates the degree of protection that the case provides against liquids and water respectively.

First Digit	Protection against solid foreign objects	Protection against body contact
0	No protection	No protection
1	Large solid foreign objects (diameter 50 mm and greater)	Protected against large parts of the body (diameter 50 mm)
2	Medium-size solid foreign objects (diameter 12 mm and greater)	Finger protection (diameter 12 mm)
3	Small solid foreign objects (diameter 2.5 mm and greater)	Tools and wires (diameter 2.5 mm and greater)
4	Granular solid foreign objects (diameter 1 mm and greater)	Tools, wire, and small wires (diameter 1 mm and greater)
5	Dust protection; dust deposits tolerable, but total amount must not be harmful to the device's function	Full protection
6	No ingress of dust	Full protection

Second Digit	Protection against liquids
0	No protection
1	Protected against vertically falling drops of water
2	Protected against direct sprays of water up to 15° from the vertical
3	Protected against direct sprays of water up to 60° from the vertical
4	Protected against water sprayed from all directions, limited ingress permitted
5	Protected against low pressure jets of water from all directions
6	Protected against heavy seas or powerful water jets (flooding)
7	Protected against the effects of temporary immersion in water
8	Protected against the effects of continuous immersion in water

IP Protection Grades

Examples:

- Indoor wand clocks with protection grade **IP 54** (range of application e.g. indoor swimming pools) have movements protected against 5 harmful amounts of dust deposits 4 water sprayed from all directions.
- A DCF77 radio receiving aerial with protection grade **IP 68** for mounting outdoors is 6 dust proof 8 waterproof (protection against immersion).

Transmission Pattern of “Legal” Time by the DCF77 low frequency radio transmitter

Transmission pattern of “legal” time

Duration of summer time

The DCF77 time signal transmitted from Mainflingen near Frankfurt/Main is derived from nuclear decay timing devices operated and controlled by the Federal Establishment for Physics and Technology (PTB) at Braunschweig. Range of this radio signal is approximately 1,500 km. Beyond this range we recommend radio control by GPS (Global Positioning System).

Duration of Summer Time*

Beginning and End of summer time have been set for the following days – 01,00 world time:

	Beginn	Ende
2017	Sunday, March 26th	Sunday, October 29th
2018	Sunday, March 25th	Sunday, October 28th
2019	Sunday, March 31st	Sunday, October 27th
2020	Sunday, March 29th	Sunday, October 25th

*for European Union countries

The General Terms and Conditions of Sale of PEWETA KG (GmbH+Co.), Hamburg

1. General

The following terms and conditions alone shall apply to all contracts for sale and contracts for work and materials concluded with us and to any offers made by us, if and to the extent that nothing to the contrary is agreed in writing. The general terms and conditions of the purchaser shall not apply, even if we do not expressly repudiate them.

2. Offers, product documentation and the acceptance of orders

Until such time as an order is confirmed in writing, any offers made by us shall remain non-binding on us. Only our written confirmation of the order shall stipulate the scope of the delivery or performance to be given. Any technical specifications and descriptions which are set out in offers or brochures or any other printed material and on the internet shall only be binding if they are designated as binding in the confirmation of the order.

We reserve the right to make any changes as the result of technical progress, as well as any optical changes, to the extent that such changes are not detrimental to the client and are reasonable.

Orders submitted by the purchaser shall only be deemed to have been accepted when they have been confirmed by us in writing, either by fax or by e-mail, by dispatch of the goods or by the issue of an invoice. Cancellations of and changes to orders shall only be valid after our written confirmation thereof has been received.

3. Prices and conditions of payment

To the extent that nothing is expressly agreed to the contrary, our ex works prices (EXW Incoterms 2010) from Hamburg shall apply, plus a fixed sum in respect of packaging and transport and value-added tax at the statutory rate. No shipping insurance cover is included in our prices.

The purchaser may only set off any counter-claims which it may have if such counter-claims are not disputed or if they have the force of *res judicata*. The same shall apply to the enforcement of any rights of retention.

4. Delivery periods and delivery conditions

Delivery periods shall be deemed to have been complied with if, by the date of the expiry of such delivery periods, the subject-matter of the delivery has been readied for dispatch ex works, or, should the dispatch of the goods be delayed for reasons which are attributable to the purchaser, if the goods' readiness for dispatch has been notified within the agreed delivery period.

Partial deliveries in accordance with an agreed delivery schedule and agreed volumes shall be permitted and may be invoiced separately.

Sale and delivery of the goods shall be subject to correct and punctual supply to ourselves.

5. Transfer of risk, damage during shipping and theft

Risk shall be transferred to the purchaser when the goods leave our warehouse or, if the purchaser has to pick up the goods himself and the due date has passed, whenever the goods' readiness for dispatch has been notified to the purchaser. The goods shall therefore in all circum-

stances be shipped at the risk of the purchaser. We shall not be liable for theft or for any damage which occurs during shipment.

6. The return of goods

Any return of goods which is not based on our statutory obligations shall be subject to our prior written consent and shall be in accordance with the following provisions: custom-made goods and goods which are not stocked by us as a matter of course may not be returned. Goods shall be taken back at their net invoice price excluding any ancillary costs (e.g. packaging or transport costs) minus a fee of 20% in respect of the inspection and processing of the goods which are taken back and any other costs associated with such return, subject to the condition that the goods are sent back to us shipping paid, in their original packaging and with their original value. The approval of any returned goods shall be a matter for us alone. Should any costs be incurred in connection with returning the goods to their original condition, the purchaser shall bear such costs.

7. Liability for defects

Any claims pursuant to visible defects shall only be permissible if they are notified to us in writing immediately and at the latest within a period of eight calendar days from the date on which the goods are received. Hidden defects must also be notified to us immediately and at the latest within a period of eight calendar days from the date of their discovery. In the event of a substantiated claim which is notified within the periods set out above, we may at our discretion and within a reasonable period repair the goods or deliver replacements free of charge. Apart from that the provisions of the law shall apply.

Claims in respect of defects in accordance with section 437 of the *Bürgerliches Gesetzbuch* [German Civil Code] shall be time-barred twelve months from the date of delivery. This provision shall not apply to claims for damages and in respect of the reimbursement of any expenses incurred. The statutory periods shall apply to such claims.

8. General liability

Claims for compensation of any nature which may be brought against us and our legal representatives and agents shall be excluded, in the absence of any intent or gross negligence or the breach of a material contractual obligation on our part.

In accordance with this provision, the breach of a material contractual obligation shall mean any obligation of which the observance makes the proper execution of the contract possible and on the observance of which the purchaser therefore may duly rely.

Liability for the gross negligence of our employees, to the extent that such employees are not management personnel, shall however be limited to compensation for typically foreseeable damage. This limitation of liability shall not apply to any breach of a material contractual obligation within the meaning of the previous paragraph.

The limitations and exclusions of liability set out above shall not apply to any liability pursuant to the *Produkthaftungsgesetz* [German Law on Product Liability] or to any domestic laws which implement the Product Liability Regulation or in the event of the death of, or physical injury to a person, or prejudice done to the health of a person.

9. Retention of title

We shall retain title to the delivered goods until payment is made to us in full of all outstanding amounts due pursuant to the commercial relationship.

It shall only be permissible to sell on the delivered goods in the normal course of business subject to a retention of title, and only if the right to receive payment pursuant to the on-sale is assigned to us. The purchaser shall be prohibited from pledging the goods or transferring them by way of security and shall also be prohibited from concluding any agreement in relation to an assignment. The purchaser must inform us immediately of any pledge or any other impairment of our rights by third parties. The purchaser hereby assigns to us in advance any rights which may accrue to it pursuant to the on-sale of our goods. We hereby accept such assignment. Should the value of the security given to us exceed the sums due to us by more than 10%, we undertake at our discretion and at the request of the purchaser to release the corresponding security.

10. Place of performance, place of jurisdiction and applicable law

The exclusive place of performance shall be Hamburg. The exclusive place of jurisdiction for all disputes with commercial parties or with persons who are not generally subject to the jurisdiction of a domestic German Court shall be Hamburg. At our discretion we may instigate proceedings against the purchaser before the Court which has jurisdiction over the location of its registered office or before the Arbitral Tribunal of the German Institution for Arbitration (DIS). In the event of arbitration proceedings, the location of the arbitration shall be Hamburg.

German law shall apply. The United Nations Convention on Contracts for the International Sale of Goods shall not apply. The Incoterms 2010 shall apply, as amended.

The general terms and conditions of sale

Prices, freight and handling

Prices	Packing, Freight, Insurance
All prices indicated in EURO (€), based on delivery ex works Hamburg (EXW, according to INCOTERMS 2010) and are on a recommendation basis without obligation only. Cost for packing, freight and insurance to be added to prices. Taxes and duties to be paid by buyer.	Cost for packing, freight and insurance to be agreed.

Changes

All details on scope of delivery, state-of-the-art, measurements and weight conform to our knowledge at the time of publishing. Prices and specifications are subject to change without notice. All rights reserved. This catalogue is effective from January 1st, 2017 on. All previous prices become ineffective at that date.

Notice

This catalogue is merely the translation of the original German edition. Technical prerequisites, e.g. receiving conditions for radio controlled systems, electrical voltages etc. have to be determined locally and must be made available to us in written form by customer before the order is placed. Feasibility can be confirmed in written form by us only. Otherwise we will supply as stated in this catalogue.
